

SolGold PLC Announces Results of AGM

20.12.2018 | [ACCESS Newswire](#)

Resultsof Annual General Meeting

BISHOPSGATE, December 20, 2018 - [SolGold plc](#) (OTC PINK: SLGGF) (LSE: SOLG) (TSX: SOLG) confirms that all resolutions put to shareholders were unanimously passed by a show of hands at the Company's Annual General Meeting, held on 20 December 2018 in Brisbane, Australia.

With reference to the announcement dated 13 November 2018, the Company confirms Mr John Bovard has now retired from the Board of Directors with immediate effect following the Company's AGM today.

A breakdown of proxy votes received ahead of the cut off is set out below:

Resolutions	Votes for ¹	% ²	Votes against	% ²	Abstain ³
Ordinary Business					
01, FINANCIAL STATEMENTS	1,083,425,969	100.00%	500	0.00%	949,624
02, REMUNERATION REPORT	829,930,099	83.57%	163,201,696	16.43%	91,244,298
03, REMUNERATION POLICY	829,246,145	83.50%	163,850,421	16.50%	91,279,527
04, RE-APPOINT C. JONES	1,083,388,798	99.94%	617,333	0.06%	369,962
05, RE-APPOINT R. WEINBERG	953,952,091	88.34%	125,890,364	11.66%	4,503,638
06, APPOINT J. CLARE	1,044,684,234	96.37%	39,400,109	3.63%	291,750
07, RE-APPOINT AUDITORS	1,083,734,939	99.98%	213,459	0.02%	427,695
08, OPTIONS GRANT - N. MATHER	840,733,898	83.91%	161,176,522	16.09%	82,465,673
09, OPTIONS GRANT - B. MOLLER	922,155,002	85.10%	161,423,621	14.90%	797,470
10, OPTIONS GRANT - R. WEINBERG	918,711,699	85.05%	161,436,827	14.95%	4,227,567
11, OPTIONS GRANT - C. JONES	922,908,070	85.11%	161,405,138	14.89%	62,885
12, OPTIONS GRANT - J. CLARE	922,874,881	85.11%	161,458,327	14.89%	42,885
13, AUTHORITY TO ALLOT SHARES	1,082,432,520	99.85%	1,647,676	0.15%	295,897

Special Business

14, DISAPPLY PRE-EMPTION RIGHTS	951,645,528	87.82%	132,013,220	12.18%	717,345
15, GENERAL MEETING NOTICE	1,081,881,032	99.83%	1,835,206	0.17%	659,855

Notes:

1. Any proxy appointments which gave discretion to the Chairman have been included in the "for" total.
2. As a percentage of the aggregate of votes "for" plus votes "against".
3. An abstention is not counted towards the votes cast "for" or "against" a resolution.

ABOUT SOLGOLD

SolGold is a leading exploration company focussed on the discovery and definition of world-class copper and gold deposits. In 2017 SolGold's management team was recognised by the "Mines and Money" Forum as an example of excellence in the industry, and was awarded again in 2018. The team continues to strive to deliver objectives efficiently and in the interests of shareholders. SolGold is the largest and most active concession holder in Ecuador and is aggressively exploring the length and breadth of this highly prospective, but underexplored, and gold-rich section of the Andean Copper Belt. SolGold aims to bring Alpala in to production, and build a copper gold major in the process.

Ecuador dedicated to become a serious mining nation

Ecuador has, over the last 5 years, been recognised globally as a frontrunner in emerging mining nations as it develops regulatory and fiscal frameworks to facilitate the development of a fiscally, socially and environmentally strong and responsible mining industry.

Dedicated stakeholders

SolGold employs a staff of over 450 and at least 90% are Ecuadorean. This is expected to grow as the operations at Alpala, and in Ecuador generally, expand. SolGold focusses operations on safety and strives to be reliable and environmentally responsible. SolGold maintains close relationships with its local communities. SolGold has engaged an increasingly skilled refined and experienced team of geoscientists using state of the art geophysical and geochemical modelling applied to an extensive data base to enable the delivery of ore grade intersections from nearly every drill hole at Alpala. SolGold has 86 geologists, of which 25% are female, on the ground in Ecuador looking for copper and gold, most of whom are at Alpala.

About Alpala

The Alpala deposit located on the northern section of the heavily endowed Andean Copper Belt, the entirety of which is renowned as the base for nearly half of the world's copper production. The project area hosts mineralisation of Eocene age, the same age as numerous Tier 1 deposits along the Andean Copper Belt in Chile and Peru to the south. The project base is located at Rocafuerte is an approximately three hour drive on sealed highway north of Quito, close to water, power supply and Pacific ports.

Alpala has produced some of the greatest drill hole intercepts in porphyry copper-gold exploration history, as exemplified by Hole 12 (CSD-16-012) returning 1560m grading 0.59% copper and 0.54 g/t gold including, 1044m grading 0.74% copper and 0.54 g/t gold.

Having fulfilled its earn-in requirements, SolGold is a registered shareholder with an unencumbered legal

and beneficial 85% interest in ENSA (Exploraciones Novomining S.A.) which holds 100% of the concession covering approximately 50km². The junior equity owner in ENSA is required to repay 15% of costs since SolGold's earn in was completed, from 90% of its share of distribution of earnings or dividends from ENSA or the concession. It is also required to contribute to development or be diluted, and if its interest falls below 10%, it shall reduce to a 0.5% NSR royalty which SolGold may acquire for US\$3.5m.

Over 160,000m of diamond drilling has been completed on the project. With 12 rigs currently active on the project, SolGold produces up to approximately 10,500m of core every month. SolGold is encouraged by recent drilling results, expected to further expand and enrich the existing resource base at Alpala in 2019. The Company is also encouraged by notable drill hole results outside the previous resource area which promise further growth for the 2019 drilling campaign ahead. The 2019 drilling campaign will focus on further expansion of the existing resource base at Alpala, namely high priority drill targets at Alpala SE, Alpala NW, Trivinio and Alpala Western Limb.

On 3 January 2018, SolGold announced its Maiden Mineral Resource Estimate (MRE). This was updated and announced in November 2018. The November 2018 Alpala MRE update was estimated from 68,173 assays, with 66,739 assays representing diamond drill core samples, and 1434 assays representing rock-saw channel samples cut from surface rock exposures. Drill core samples were obtained from total of 133,576m of drilling comprising 128 diamond drill holes, including 75 drill holes (Holes 1-75), 34 daughter holes, 8 redrills, and 11 over-runs, and represents full assay data from holes 1-67 and partial assay data received from holes 68 to 75. Rock-saw samples were obtained from 2743m of rock-saw cuts from 262 surface rock exposure trenches. In contrast, the Dec 2017 Maiden MRE was estimated from 26,814 assays obtained from 53,616m of drilling comprising 45 drill holes (Holes 1-33) including 10 daughter holes and 5 redrills.

There now exists approximately triple the amount of drilling and assay information since the maiden MRE of December 2017, and this has resulted in significant growth in tonnage (approximately 273%) and contained metal (approximately 108%) and a far greater proportion of the MRE now being in the Indicated Mineral Resource category (2018: 77%, 2017:40%).

The Alpala updated Mineral Resource Estimate (MRE) totals a current:

~~2,015~~ 2,015 Mt @ 0.60% CuEq (at 0.2% CuEq cut-off) in the Indicated category, and 900 Mt @ 0.35% CuEq (at 0.2% CuEq cut-off) in the Inferred category.

~~and~~ contained metal content of 8.4 Mt Cu and 19.4 Moz Au in the Indicated category.

~~and~~ contained metal content of 2.5 Mt Cu and 3.8 Moz Au in the Inferred category.

The updated 2018 MRE will be supported by a full 43-101 Technical Report to be filed by 4 January 2019.

Getting Alpala advanced towards development

SolGold has appointed feasibility management to initially address the production of a preliminary economic assessment (PEA), prior to the prefeasibility and feasibility studies.

The resource at the Alpala deposit boasts a high grade core which, in the event of the construction of a mine, is targeted to facilitate early cashflows and an accelerated payback of initial capital. SolGold is currently investigating development and financing options available to the company for the development of Alpala on reaching feasibility.

SolGold's regional push

SolGold is using its successful and cost efficient blueprint established at Alpala to explore for additional world class copper and gold projects across Ecuador. SolGold is the largest and most active concessionaire in Ecuador having recognised as early as 2014 that the country hosted the same untested prospectivity as the Northern Chilean section of the Andean Copper Belt, which accounts for some 25% of the world's copper resources.

The Company believes Alpala is just the beginning for SolGold in Ecuador. The Company wholly owns four other subsidiaries active throughout the country that are now focussed on eleven high priority gold and copper resource targets, several of which the Company believes have the potential, subject to resource definition and feasibility, to be developed in close succession or even on a more accelerated basis from Alpala.

SolGold is listed on the London Stock Exchange and Toronto Stock Exchange (LSE/TSX: SOLG). The Company has on issue a total of 1,846,321,033 fully-paid ordinary shares; 21,250,000 share options exercisable at 40p and 129,887,000 share options exercisable at 60p.

CAUTIONARY NOTICE

News releases, presentations and public commentary made by [SolGold plc](#) (the "Company") and its Officers may contain certain statements and expressions of belief, expectation or opinion which are forward looking statements, and which relate, inter alia, to interpretations of exploration results to date and the Company's proposed strategy, plans and objectives or to the expectations or intentions of the Company's Directors. Such forward-looking and interpretative statements involve known and unknown risks, uncertainties and other important factors beyond the control of the Company that could cause the actual performance or achievements of the Company to be materially different from such interpretations and forward-looking statements.

Accordingly, the reader should not rely on any interpretations or forward-looking statements; and save as required by the exchange rules of the TSX and LSE or by applicable laws, the Company does not accept any obligation to disseminate any updates or revisions to such interpretations or forward-looking statements. The Company may reinterpret results to date as the status of its assets and projects changes with time expenditure, metals prices and other affecting circumstances.

This release may contain "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, but is not limited to, statements regarding the Company's plans for developing its properties. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved".

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including but not limited to: transaction risks; general business, economic, competitive, political and social uncertainties; future prices of mineral prices; accidents, labour disputes and shortages and other risks of the mining industry. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

The Company and its officers do not endorse, or reject or otherwise comment on the conclusions, interpretations or views expressed in press articles or third-party analysis, and where possible aims to circulate all available material on its website.

The Company recognises that the term "World Class" is subjective and for the purpose of the Company's projects the Company considers the drilling results at the growing Alpala Porphyry Copper Gold Deposit at its Cascabel Project to represent intersections of a "World Class" deposit. The Company considers that "World Class" deposits are rare, very large, long life, low cost, and are responsible for approximately half of total global metals production.

"World Class" deposits are generally accepted as deposits of a size and quality that create multiple expansion opportunities, and have or are likely to demonstrate robust economics that ensure development irrespective of position within the global commodity cycles, or whether or not the deposit has been fully drilled out, or a feasibility study completed.

Standards drawn from industry experts (1) Singer and Menzie, 2010; (2) Schodde, 2006; (3) Schodde and Hronsky, 2006; (4) Singer, 1995; (5) Laznicka, 2010) have characterised "World Class" deposits at prevailing commodity prices. The relevant criteria for "World Class" deposits, adjusted to current long run commodity prices, are considered to be those holding or likely to hold more than 5 million tonnes of copper and/or more than 6 million ounces of gold with a modelled net present value of greater than USD 1 Billion.

The Company and its external consultants prepared an updated 2018 Alpala MRE with an effective date of 16 November 2018. Results are summarised in Table B attached.

There remains strong potential for further growth from more recent drilling results, and continue rapid growth of the deposit.

Any development or mining potential for the project remains speculative.

Drill hole intercepts have been updated to reflect current commodity prices, using a data aggregation method, defined by copper equivalent cut-off grades and reported with up to 10m internal dilution, excluding bridging to a single sample. Copper equivalent grades are calculated using a gold conversion factor of 0.63, determined using an updated copper price of USD3.00/pound and an updated gold price of USD1300/ounce. True widths of down hole intersections are estimated to be approximately 25-70%.

On the basis of the drilling results to date and the results of the Alpala Maiden Mineral Resource Estimate, the reference to the Cascabel Project as "World Class" (or "Tier 1") is considered to be appropriate. Examples of global copper and gold discoveries since 2006 that are generally considered to be "World Class" are summarised in Table A.

Table A: Tier 1 global copper and gold discoveries since 2006. This table does not purport to be exhaustive exclusive or definitive.

Grade	Resource	Tonnage	Grade	Contained Metal				
Category	Category	(Mt)	Cu (%)	Au (g/t)	CuEq (%)	Cu (Mt)	Au (Moz)	CuEq (Mt)

	Indicated	2,050	0.41	0.29	0.60	8.4	19.4	12.2
Total >0.2% CuEq	Inferred	900	0.27	0.13	0.35	2.5	3.8	3.2

Table B: Alpala Mineral Resource Estimate updated effective 16 November 2018.

Notes:

&Mull: Martin Pittuck, MSc, CEng, MIMMM, is responsible for this Mineral Resource estimate and is an "independent qualified person" as such term is defined in NI 43-101.

&Toll: Mineral Resource is reported using a cut-off grade of 0.3% copper equivalent calculated using [copper grade (%)] + [gold grade (g/t) x 0.6] based on a copper price of US\$2.8/lb and gold price of US\$1,160/oz.

&Toll: Mineral Resource is considered to have reasonable potential for eventual economic extraction by underground mass mining such as block caving.

&Mull: Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

&Toll: statement uses the terminology, definitions and guidelines given in the CIM Standards on Mineral Resources and Mineral Reserves (May 2014).

&Toll: MRE is reported on 100 percent basis.

&Toll: values given in the table have been rounded, apparent calculation errors resulting from this are not considered to be material.

&Toll: effective date for the Mineral Resource statement is 16 November 2018.
