## About Ely Gold Royalties

[Ely Gold Royalties Inc.](#) is a Vancouver based, emerging royalty company with development assets focused in Nevada and the Western US. Its current portfolio includes 31 Deeded Royalties and 19 properties optioned to third parties. All 50 of these properties are being explored by third parties. Ely Gold's royalty portfolio includes producing royalties, royalties on fully permitted mines, mines under construction and development projects that are being permitted for mine construction. The Company is actively purchasing existing third-party royalties for its portfolio and all the Company's Option Properties will produce royalties, if exercised. The royalty and option portfolios are currently generating significant revenue. Ely Gold is well positioned with its current portfolio of over 20 available properties to generate additional operating revenue through option and sale transactions. The Company has a proven track record of maximizing the value of its properties through claim consolidation and advancement using its extensive, proprietary data base. All portfolio properties are sold or optioned on a 100% basis, while the Company retains net smelter royalty interests. Management believes that due to the Company's ability to generate option and royalty transactions, its successful strategy of organically creating royalties, its equity portfolio and its current low valuation, Ely Gold offers shareholders a low-risk leverage to the current price of gold, exploration in Nevada and low-cost access to long-term mineral royalties.
