

SandRidge Energy, Inc. Reports Financial and Operational Results for Fourth Quarter and Full Year 2018

04.03.2019 | [PR Newswire](#)

OKLAHOMA CITY, March 4, 2019 - [SandRidge Energy, Inc.](#) (the "Company" or "SandRidge") (NYSE:SD) today announced financial and operational results for the quarter and fiscal year ended December 31, 2018.

Highlights During and Subsequent to Fourth Quarter and Full Year 2018

- Appointed Paul McKinney as President & CEO in January 2019
- Fourth quarter net income of \$54 million, or \$1.53 per share (including \$43 million of gains on derivatives), and net cash provided by operating activities of \$36 million, or \$1.15 per share (excluding non-cash impact of hedges and other items)
- Year end 2018 net loss of \$9 million, or \$0.26 per share (including \$17 million of loss on derivatives), and adjusted net income of \$20 million, or \$0.57 per share (excluding non-cash impact of hedges and other items)
- Adjusted EBITDA of \$45 million for the fourth quarter and \$167 million for year end 2018
- Beat midpoint of 2018 production guidance while achieving cash costs and capital expenditures that were 3% and 1% below midpoint of guidance, respectively
- North Park production increased 53% year over year, reaching 30% of total Company oil production in 2018
- Standardized Measure and PV-10 of \$1.0 billion (\$612 million using alternative pricing of \$54/Bbl and \$2.75/MME)

"This is a great time to be joining SandRidge Energy," said Paul McKinney, President and CEO. "With a clean balance sheet, a talented team of oil and gas professionals, and the support of our Board of Directors, we are focusing on profitably growing shareholder value. We have developed a business strategy founded on the principles and industry best practices that we believe will deliver a competitive rate of return to our shareholders on a sustainable basis. Considering the commodity price volatility the industry is experiencing, we plan to maintain flexibility in our capital spending plans with the intention of staying within our cash flow. This strategy also supports our ability to capture accretive opportunities we encounter in the market."

"Our business strategy is focused on a few key components we believe will drive success as we acquire, explore for and develop hydrocarbon resources in the United States. To win in this industry you need to have a winning team and we will do what is necessary to attract and retain top tier talent. We will pursue operational excellence with a sense of urgency to deliver high quality, efficient execution of our operations, leveraging advanced technologies and data analytics to develop a culture of continuous improvement while holding to our core values prioritizing health, safety and environmental stewardship. We will allocate resources to projects that deliver high margins and returns while fully accounting for risk and uncertainty in each investment opportunity, optimize our portfolio by upgrading our assets through accretive acquisitions, mergers and dispositions that reduce break-even costs, and explore all avenues of cost reduction. Finally, we will continue to exercise financial discipline by managing our balance sheet through responsible use of leverage and hedging and financial strategies that sustain our capital program and ultimately deliver free cash flow with competitive debt-adjusted per share returns."

Financial Results

Fourth Quarter

For the fourth quarter, the Company reported net income of \$54 million, or \$1.53 per share, and net cash provided by operating activities of \$36 million. After adjusting for certain items, the Company's adjusted net income amounted to \$5 million, or \$0.15 per share, operating cash flow totaled \$44 million and adjusted EBITDA was \$45 million for the quarter. The Company defines adjusted net income, adjusted EBITDA and other non-GAAP financial measures to the most directly comparable measure in supporting tables at the conclusion of this press release beginning on page 15.

Full Year

For the full year of 2018, the Company reported a net loss of \$9 million, or \$0.26 per share, and net cash provided by operating activities of \$167 million.

activities of \$146 million. After adjusting for certain items, the Company's adjusted net income amounted to \$20 million, per share, operating cash flow totaled \$137 million and adjusted EBITDA was \$167 million for the year.

Operational Results and Activity

Production totaled 3.1 MMBoe (27% oil, 24% NGLs and 49% natural gas) for the fourth quarter and 12.3 MMBoe (28% NGLs and 49% natural gas) for the full year of 2018. During the quarter, the Company averaged two rigs in the Mid-Continent region targeting the Mississippian and the Northwest STACK Meramec and one rig in North Park Basin targeting the Niobrara.

North Park Basin Asset in Jackson County, Colorado

Fourth Quarter

Net oil production in the North Park Basin totaled 314 MBo (3.4 MBopd) for the fourth quarter. During the quarter, the Company drilled six wells.

Full Year 2018

In 2018, the Company drilled twelve North Park Basin wells and brought nine wells to sales. One rig drilled two spacing test federal unit obligation well and initiated southern delineation. Production from the eight well eastern spacing test exceeded curve expectation by a cumulative 14% on an average per well basis and confirmed a minimum of twelve wells per section in this area. The Company also drilled a six well western spacing test using a twenty-three wells per section pattern. These are currently being tested with results expected early in the second quarter 2019. With seven months of drilling, the Company increased oil production in the field by 53% year over year.

Efforts to expand gas processing capabilities progressed throughout the year. The mechanical refrigeration unit "MRU" went into service during the first quarter 2019. The MRU is currently processing 2,000 Mcf per day to extract natural gas liquids and reduce emissions within the field. Construction of a gas to liquids "GTL" processing facility is ongoing with initial installation expected in the second quarter 2019. The GTL pilot is projected to convert 500 Mcf per day into 50 Bbls of diesel and naphtha, with no net gas.

Mid-Continent Assets in Oklahoma and Kansas

Fourth Quarter

In the fourth quarter, production in the Mississippian totaled 2.5 MMBoe (27 MBoepd, 17% oil) and Northwest STACK production totaled 183 MBoe (2 MBoepd, 40% oil). The Company averaged two rigs in the Mid-Continent and drilled seven wells, three in the Mississippian and five in the Northwest STACK.

The five wells drilled in the Northwest STACK targeted the Meramec, with three wells drilled under the previously announced Drilling Participation Agreement. During the quarter, the Company brought three wells to sales in the Northwest STACK with a 30-Day IP per well average of 292 Boepd (67% oil).

During the quarter, the Company drilled the remaining two wells of the Mississippian four well program and brought three wells online.

Full Year 2018

During the year, the Company drilled twenty-two wells in the Mid-Continent with an average of two rigs and brought two wells to sales. In the Northwest STACK, eighteen Meramec wells were drilled with fifteen wells under the Drilling Participation Agreement. Under this agreement, the Company spent only \$6 million in total drilling and completion capital for 2018. As a result, the Company converted 5,800 acres to 'held by production,' delineated the play and optimized geologic targeting and completions technology. In the Mississippian, the Company drilled and completed a four well program which produced a 30-Day IP per well average of 292 Boepd (67% oil).

Boepd (58% oil).

Year End 2018 Estimated Proved Reserves

The Company's total estimated SEC proved reserves as of December 31, 2018 were 160 MMBoe, a decrease of 10% year. The Company's Standardized Measure and PV-10 was \$1.0 billion, an increase of 40% year over year. SEC pricing for the preparation of the December 31, 2018 reserves was \$65.56 per Bbl for oil and \$3.10 per MMBtu for natural gas, before adjustments.

For comparative purposes, utilizing alternative pricing of \$54.00 per Bbl of oil and \$2.75 per MMBtu for natural gas rather than SEC pricing for oil and natural gas, total reserves at December 31, 2018 were 128 MMBoe, with a PV-10 of \$612 million. These calculations were based on the SEC proved reserves estimation methodology, but applied the aforementioned alternative pricing.

Proved reserves decreased from 177.6 MMBoe at December 31, 2017 to 160.2 MMBoe at December 31, 2018, primarily as a result of incorporating a one-time adjustment to estimated future workover costs in the Mississippian Lime where a large population of these wells are transitioning into late-life mature production. This estimate of future costs contributed to a 10.4 MMBoe decrease associated with shorter economic lives and when combined with a decrease of 8.3 MMBoe attributable to well performance, results in total revisions of 33.2 MMBoe (7% oil). Proved reserves also decreased 6.6 MMBoe due to divestitures. These reductions were partially offset by the acquisition of 15.4 MMBoe associated with the purchase of interest in Midcontinent wells, extensions and discoveries of 19.3 MMBoe from successful drilling, as well as recording proved undeveloped reserves and increased well density in the North Park Basin.

	Oil MBbls	NGLs MBbls	Gas MMcf	Equivalent MBoe ¹	Standardized Measure /PV-10 \$MM	
Proved Reserves, December 31, 2017	61,791	34,314	488,932	177,594	\$	749
Extensions & Discoveries	11,148	2,320	35,185	19,332		
Purchases	2,146	4,131	54,436	15,350		
Sales of Assets	(5,273)	(809)	(2,969)	(6,577)		
Production	(3,477)	(2,829)	(36,175)	(12,335)		
Revisions	(2,316)	(8,952)	(131,518)	(33,188)		
Proved Reserves, December 31, 2018	64,019	28,175	407,891	160,176	\$	1,046

1) Equivalent Boe are calculated using an energy equivalent ratio of six Mcf of natural gas to one Bbl of oil. Using an energy equivalent ratio of six Mcf of natural gas to one Bbl of oil.

SEC Proved Reserves and Alternative Price Based Proved Reserves

	YE 2018 @ SEC Pricing ¹		YE 2018 @ Alternative Pricing ²	
	Equivalent MBoe	Standardized measure / PV-10 \$MM	Equivalent MBoe	PV-10 \$MM
Developed	92,302	\$ 659	82,659	\$ 479
Undeveloped	67,874	\$ 387	44,847	\$ 133
Total Proved	160,176	\$ 1,046	127,506	\$ 612

1) SEC Pricing remains flat for reserve life at \$65.56/Bo & \$3.10/MMBtu

2) Alternative pricing of \$54.00/Bo & \$2.75/MMBtu

2019 Capital Expenditures and Operational Guidance

In 2019, the Company plans to spend \$160 - \$180 million in total capital expenditures, which includes \$115 - \$125 million in drilling and completion capital allocated between the North Park Basin and Mid-Continent. Total production for 2019 is projected to be 11.4 - 12.0 MMBoe with oil production over 32%. Other operational guidance detail can be found on the "2019 Operational and Capital Expenditure Guidance" table below.

Liquidity and Capital Structure

As of February 20, 2019, the Company had no debt and total liquidity was \$356 million, which includes \$11 million of cash and \$345 million of borrowing base under the credit facility, net of outstanding letters of credit.

Conference Call Information

The Company will host a conference call to discuss these results on Tuesday, March 5, 2019 at 8:00 am CT. The telephone number to access the conference call from within the U.S. is (833) 245-9650 and from outside the U.S. is (647) 689-4222. The passcode for the call is 3764669. An audio replay of the call will be available from March 5, 2019 until 11:59 pm CT on April 4, 2019. The number to access the conference call replay from within the U.S. is (800) 585-8367 and from outside the U.S. is (416) 621-4642. The passcode for the replay is 3764669.

A live audio webcast of the conference call will also be available via SandRidge's website, www.sandridgeenergy.com, under Investor Relations/Presentation & Events. The webcast will be archived for replay on the Company's website for 30 days.

2019 Operational and Capital Expenditure Guidance

Presented below is the Company's operational and capital expenditure guidance for 2019.

	Guidance
	Projection as of
	March 4, 2019
Production	
Oil (MMBbls)	3.7 - 3.9
Natural Gas Liquids (MMBbls)	2.5 - 2.6
Total Liquids (MMBbls)	6.2 - 6.5
Natural Gas (Bcf)	31.0 - 33.0
Total (MMBoe)	11.4 - 12.0
Price Differentials to NYMEX	
Oil (per Bbl)	(\$4.30)
Natural Gas Liquids (realized % of NYMEX WTI)	37%
Natural Gas (per MMBtu)	(\$1.30)
Expenses	
LOE	\$89 - \$94 million
Adjusted G&A Expense ⁽¹⁾	\$34 - \$37 million
% of Revenue	
Severance and Ad Valorem Taxes	6.5% - 7.0%
Capital Expenditures (\$ in millions)	
Drilling and Completion	\$115 - \$125
Other Exploration and Production	\$45 - \$55
Total Capital Expenditures	\$160 - \$180
(excluding acquisitions and plugging and abandonment)	

1. Adjusted G&A expense is a non-GAAP financial measure. The Company has defined this measure at the conclusion of this press release under "Non-GAAP Financial Measures" beginning on page 15. Information to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure is not available at this time, as management is unable to forecast the excluded items for future periods.

2018 Actual Results vs. 2018 Guidance

Presented below is the Company's 2018 operational and capital expenditure actuals vs. the midpoint of 2018 guidance.

This press release includes non-GAAP financial measures. These non-GAAP measures are not alternatives to GAAP measures, and you should not consider these non-GAAP measures in isolation or as a substitute for analysis of our results as reported under GAAP. Below is additional disclosure regarding each of the non-GAAP measures used in this press release, including reconciliations to their most directly comparable GAAP measure.

Reconciliation of Cash Provided by Operating Activities to Operating Cash Flow

The Company defines operating cash flow as net cash provided by operating activities before changes in operating assets and liabilities as shown in the following table. Operating cash flow is a supplemental financial measure used by the Company's management and by securities analysts, investors, lenders, rating agencies and others who follow the industry as an indicator of the Company's ability to internally fund exploration and development activities and to service or incur additional debt. The Company also uses this measure because operating cash flow relates to the timing of cash receipts and disbursements that the Company may not control and may not relate to the period in which the operating activities occurred. Further, operating cash flow allows the Company to compare its operating performance and return on capital with those of other companies without regard to financing methods and capital structure. This measure should not be considered in isolation or as a substitute for net cash provided by operating activities prepared in accordance with GAAP.

Operating cash flow	\$ 44,043	\$ 40,531	\$ 136,804	\$ 182,738

Reconciliation of Net Income (Loss) to EBITDA and Adjusted EBITDA

The Company defines EBITDA as net income (loss) before income tax benefit, interest expense, depreciation and amortization - other and depreciation and depletion - oil and natural gas. Adjusted EBITDA, as presented herein, is EBITDA excluding items that the Company believes affect the comparability of operating results such as items whose timing and/or amount cannot be reasonably estimated or are non-recurring, as shown in the following tables.

Adjusted EBITDA is presented because management believes it provides useful additional information used by the Company's management and by securities analysts, investors, lenders, ratings agencies and others who follow the industry for analysis of the Company's financial and operating performance on a recurring basis and the Company's ability to internally fund exploration and development and to service or incur additional debt. In addition, management believes that adjusted EBITDA is widely used by professional research analysts and others in the valuation, comparison and investment recommendations of companies in the oil and gas exploration and production industry. The Company's adjusted EBITDA may not be comparable to similarly titled measures used by other companies.

1. Excludes associated stock-based compensation.

Reconciliation of Net Income (Loss) Available to Common Stockholders to Adjusted Net Income Available to Common Stockholders

The Company defines adjusted net income as net income excluding items that the Company believes affect the comparability of operating results and are typically excluded from published estimates by the investment community, including items whose timing and/or amount cannot be reasonably estimated or are non-recurring, as shown in the following tables.

Management uses the supplemental measure of adjusted net income as an indicator of the Company's operational trends and performance relative to other oil and natural gas companies and believes it is more comparable to earnings estimates provided by securities analysts. Adjusted net income is not a measure of financial performance under GAAP and should not be considered a substitute for net income available to common stockholders.

	Basic	Diluted ⁽¹⁾	Basic
1. Weighted average fully diluted common shares outstanding for certain periods presented includes shares that are considered antidilutive for calculating loss per share in accordance with GAAP	35,057	35,057	32,442
Reconciliation of PV-10 to Standardized Measure			
Total adjusted net income per share	\$ 0.57	\$ 0.57	\$ 1.62

PV-10 is a non-GAAP financial measure and represents the present value of estimated future cash inflows from proved oil, natural gas and NGL reserves, less future development and production costs, discounted at 10% per annum to reflect timing of future cash flows and using 12-month average prices for the years ended December 31, 2018 and 2017. PV-10 differs from Standardized Measure because it does not include the effects of income taxes on future net revenues. PV-10 is used by the industry and by management as a reserve asset value measure to compare against past reserve bases and the reserve bases of other business entities. It is useful because its calculation is not dependent on the taxpaying status of the entity. Because of the present value of future income tax discounted at 10% is insignificant, these measures are equivalent.

PV-10 utilizing alternative pricing of \$54.00 per Bbl of oil and \$2.75 per MMBtu for natural gas is a non-GAAP financial measure. It differs from Standardized Measure and is useful to investors because it reflects the potential value of proved reserves based on commodity price assumptions more closely representative of current average NYMEX futures prices rather than SEC pricing and does not include the effects of income taxes on future net revenues. Neither the PV-10 of the Company's SEC reserves, the PV-10 utilizing alternative pricing nor the Standardized Measure represents an estimate of fair market value of the Company's oil and natural gas properties.

Reconciliation of G&A to Adjusted G&A

The Company reports and provides guidance on Adjusted G&A per Boe because it believes this measure is commonly used by management, analysts and investors as an indicator of cost management and operating efficiency on a comparable basis from period to period and to compare and make investment recommendations of companies in the oil and gas industry. This non-GAAP measure allows for the analysis of general and administrative spend without regard to stock-based compensation programs and other non-recurring cash items which can vary significantly between companies. Adjusted G&A per Boe is not a measure of financial performance under GAAP and should not be considered a substitute for general and administrative expense per Boe. Therefore, the Company's Adjusted G&A per Boe may not be comparable to other companies' similarly titled measures.

The Company defines adjusted G&A as general and administrative expense adjusted for certain non-cash stock-based compensation and other non-recurring items as shown in the following tables.

	Three Months Ended December 31, 2018				Three Months Ended Dec			
	\$		\$/Boe		\$		\$	
	(In thousands, except per Boe amounts)

Cautionary Note to Investors - This press release includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including, but not limited to, the information appearing under the heading "2019 Operational and Capital Expenditure Guidance." These forward-looking statements are neither historical facts nor assurances of future performance and reflect SandRidge's current beliefs and expectations regarding future events and operating performance. The forward-looking statements include projections and estimates of the Company's corporate strategies, future operations, and development plans and appraisal programs, drilling inventory and locations, estimated oil, and natural gas and natural gas liquids production, reserves, price realizations and differentials, hedging program, projected operating, general and administrative and other costs, projected capital expenditures, tax rates, efficiency and cost reduction initiative outcomes, liquidity and capital structure and infrastructure assessment and investment. We have

based these forward-looking statements on our current expectations and assumptions and analyses made by us in light of our experience and our perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, whether actual results and developments will conform with our expectations and predictions is subject to a number of risks and uncertainties, including the volatility of oil and natural gas prices, our success in discovering, estimating, developing and replacing oil and natural gas reserves, actual decline curves and the actual effect of adding compression to natural gas wells, the availability and terms of capital, the ability of counterparties to transactions with us to meet their obligations, our timely execution of hedge transactions, credit conditions of global capital markets, changes in economic conditions, the amount and timing of future development costs, the availability and demand for alternative energy sources, regulatory changes, including those related to carbon dioxide and greenhouse gas emissions, and other factors, many of which are beyond our control. We refer you to the discussion of risk factors in Part I, Item 1A - "Risk Factors" of our Annual Report on Form 10-K and in comparable "Risk Factor" sections of our Quarterly Reports on Form 10-Q filed after such form 10-K. All of the forward-looking statements made in this press release are qualified by these cautionary statements. The actual results or developments anticipated may not be realized or, even if substantially realized, they may not have the expected consequences to or effects on our Company or our business or operations. Such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. We undertake no obligation to update or revise any forward-looking statements.

[SandRidge Energy, Inc.](#) (NYSE: SD) is an oil and natural gas exploration and production company headquartered in Oklahoma City, Oklahoma with its principal focus on developing high-return, growth oriented projects in Oklahoma and Colorado. The majority of the Company's production is generated from the Mississippian Lime formation in Oklahoma and Kansas. Development activity is currently focused on the Meramec formation in the Northwest STACK Play in Oklahoma and multiple oil rich Niobrara benches in the Colorado North Park Basin.
