

Margaret Lake Diamonds Receives Exploration Permit for Kiyuk Lake Gold Property, Nunavut

04.04.2019 | [ACCESS Newswire](#)

VANCOUVER, April 4, 2019 - [Margaret Lake Diamonds Inc.](#) (TSX.V: DIA / FSE: M85) ("Margaret Lake" or the "Company") is pleased to announce the Company has received approval for a Land Use Permit ("LUP") valid until April 2024 at its Kiyuk Lake Gold Property ("Kiyuk Lake" or the "Property"). Additionally, the Company has completed a detailed ground geophysical survey. Interpretation of the data is underway and results will be reported shortly. The survey will be used to identify structures in bedrock that correlate with known zones of gold mineralization revealed in past drilling and also help finalize the planned 5,000 meter diamond drill program, which will focus on expanding high-grade Rusty zone along strike and to depth as well as testing other high priority drill targets.

About the Kiyuk Lake Gold Property

The Kiyuk Lake land package consists of 70 contiguous mineral claims encompassing over 59,000 hectares and offers year-round accessibility to a 35-person base camp. Significant past exploration, beginning with Newmont Mining in 2008 and most recently Cache Exploration in 2017, has resulted in over 13,000 meters of core drilling and delineation of four mineralized zones and five additional high priority target areas that have yet to be drill tested. Mineralization has been traced across a 13-kilometer strike length and remain open in all directions. The main focus of exploration to date has been on the high-grade Rusty zone. In 2017, drilling within the Rusty zone returned broad intercepts of gold mineralization including:

- 8m of 26.48 g/t gold from 108m, including 2m of 92.76 g/t gold from 110m, in DDH KI17-001
- 38m of 1.16 g/t gold from 58m, including 8m of 3.98 g/t gold from 68m, in DDH KI17-002
- 122m of 1.82 g/t gold from 188m, including 15m of 3.34 g/t gold from 294m, in DDH KI17-004
- 249m of 1.6 g/t gold from 8.2m in DDH KI13-004 (no cut-off)

** Drill intercepts are not true width. True widths are not known at this time. See [Cache Exploration Inc.](#) press releases dated October 12, 2017 and October 26, 2017 and Prosperity Goldfields press release dated April 9, 2013. While the Company believes the historical work was performed according to best practices and the exploration data is reliable, a Qualified Person has not verified the results independently.*

About Margaret Lake Diamonds Inc.

[Margaret Lake Diamonds Inc.](#) (TSX.V: DIA) is a Canadian junior mining company focused on mineral exploration in Canada's most prolific mining districts. The Company is earning an 80% interest in the high-grade Kiyuk Lake Gold Property located in southern Nunavut and also holds interests in two diamond exploration properties in the Northwest Territories- the Margaret Lake project located adjacent to Mountain Province Diamond's Kennady North project and close proximity to Gahcho Kué, the newest Canadian diamond mine owned by De Beers and Mountain Province Diamonds. The Company also has a 60/40 joint venture with [Arctic Star Exploration Corp.](#) (TSX.V: ADD) to explore the Diagrass property, which is comprised of 23 claims totaling 18,699 hectares located in the prolific Lac de Gras diamond field.
