Shares Outstanding: 171,776,481

HALIFAX, April 24, 2019 - [GoGold Resources Inc.](#) (TSX: GGD) ("GoGold", "the Company") continues to deliver strong assay results from an additional four diamond drill holes at the recently acquired 29 concession Los Ricos project located about 100 km northwest of the city of Guadalajara.

"These four holes focused on following the high grade ore shoot down dip below the historical RC drilling. We were pleased to see the results showing high grade ore which exceeded our expectations. Furthermore, our team is defining the extension of the mineralization along strike southeast of the old workings towards the prospect known as Cerro Colorado where we have completed a number of trenches across the zone, and expect to have the results in short order" stated Brad Langille, President and CEO.

Diamond drill hole LRGG-19-003 intersected 20.4 m averaging 2.21 g/t gold, 318.7 g/t silver and 6.45 g/t gold equivalent including 7.2m averaging 6.17 g/t gold, 869.5 g/t silver and 17.77 g/t gold equivalent.

Diamond drill holes LRGG-19-004, LRGG-19-005, and LRGG-19-006 aided in defining the boundaries of the high grade ore shoot, and included an intersect of 2.8m averaging 1.41 g/t gold, 52.6 g/t silver and 2.11 g/t gold equivalent. Detailed intersections are in Table 1, and location of drill holes are included in Table 2.

Table 1: Drill Hole Intersections

Hole ID	Comment	From (m)	To (m)	Length <sup>2</sup> (m)	Au (g/t)	Ag (g/t)	AuEq <sup>1</sup> (g/t)
LRGG-19-003	Main	145.0	165.4	20.4	2.21	318.7	6.45
	including	145.0	155.5	10.5	4.26	608.0	12.36
	including	146.0	153.2	7.2	6.17	869.5	17.77
LRGG-19-004	Main	96.5	99.0	2.5	0.04	27.2	0.40
LRGG-19-005	Main	121.0	131.8	10.8	0.19	53.8	0.91
LRGG-19-006	Main	107.1	132.0	25.0	0.33	35.7	0.81
	including	119.7	122.5	2.8	1.41	52.6	2.11

Table 2: Drill Hole Locations

Hole ID	Easting	Northing	Elev	Azimuth	Dip	Final
LRGG-19-003	610595	2327525	1421.9	50	-50	177.00
LRGG-19-004	610786	2327429	1392.9	50	-60	160.50
LRGG-19-005	610730	2327445	1402.9	50	-60	180.00
LRGG-19-006	610707	2327493	1419.9	50	-50	201.00

GoGold commenced a 10,000 m diamond drilling program of HQ size core in conjunction with a field program of geological mapping, sampling and trenching on the property in March 2019. The core drilling campaign is focused on defining the mineralized halo around the historical high grade ore shoots as defined by the underground workings and the 65 historical RC drill holes on the property.

The diamond drill core (HQ size) is geologically logged, photographed and marked for sampling. When the sample lengths are determined, the full core is sawn with a diamond blade core saw with one half of the core being bagged and tagged for assay. The remaining half portion is returned to the core trays for storage and/or for metallurgical test work.

The sealed and tagged sample bags are transported to the ActLabs facility in Zacatecas, Mexico. ActLabs crushes the samples and prepares 200-300 gram pulp samples with ninety percent passing Tyler 150 mesh (106?m). The pulps are assayed for gold using a 50 gram charge by fire assay (Code 1A2-50) and over limits greater than 10 grams per tonne are re-assayed using a gravimetric finish (Code 1A3-50). Silver and multi-element analysis is completed using total digestion (Code 1F2 Total Digestion ICP).

#### Quality Assurance / Quality Control and Data Verification

Quality assurance and quality control ("QA/QC") procedures monitor the chain-of-custody of the samples and includes the systematic insertion and monitoring of appropriate reference materials (certified standards, blanks and duplicates) into the sample strings. The results of the assaying of the QA/QC material included in each batch are tracked to ensure the integrity of the assay data. All results stated in this announcement have passed GoGold's QA/QC protocols.

Mr. David Duncan, P. Geo. is the qualified person as defined by National Instrument 43-101 and is responsible for the technical information of this release.

#### About GoGold Resources

GoGold Resources (TSX: GGD) is a Canadian-based silver and gold producer focused on operating, developing, exploring and acquiring high quality projects in Mexico. The Company operates the Parral Tailings project in the state of Chihuahua, and has the Los Ricos exploration project in the state of Jalisco. Headquartered in Halifax, NS, GoGold is building a portfolio of low cost, high margin projects. For more information visit [gogoldresources.com](http://gogoldresources.com).

#### CAUTIONARY STATEMENT:

The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws, and may not be offered or sold within the United States or to, or for the benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except in compliance with the registration requirements of the U.S. Securities Act and

applicable state securities laws or pursuant to exemptions therefrom. This release does not constitute an offer to sell or a solicitation of an offer to buy of any of GoGold's securities in the United States.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, the Los Ricos project, future operating margins, future production and processing, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral project. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.
