About Lydian International Limited

Lydian is a gold developer focusing on construction at its 100%-owned Amulsar Gold Project, located in south-central Armenia. However, illegal blockades have prevented access to Amulsar since late June 2018. Amulsar will be a large-scale, low-cost operation with production targeted to average approximately 225,000 ounces annually over an initial 10-year mine life. Open pit mining and conventional heap leach processing contribute to excellent scale and economic potential. Estimated mineral resources contain 3.5 million measured and indicated gold ounces and 1.3 million inferred gold ounces as outlined in the Q1 2017 Technical Report. Existing mineral resources beyond current reserves and open extensions provide opportunities to improve average annual production and extend the mine life. Lydian is committed to good international industry practices in all aspects of its operations including production, sustainability, and corporate social responsibility.
