

Camino Discovers New Copper Zone at Chapitos

05.06.2019 | [Newsfile](#)

Edmonton, June 5, 2019 - [Camino Minerals Corp.](#) (TSXV: COR) (OTCQB: CAMZF) (WKN: A116E1) ("Camino" or the "Company") has discovered a new zone of copper mineralization on its 100% owned Chapitos Copper-Gold project, near Chala, Southern Peru.

CEO John Williamson commented, "Our methodical and systematic approach to exploration on the Chapitos project has been very rewarding and has resulted in the discovery of another new zone of completely unrecognized mineralization. Planning is already underway to follow-up on these very strong results at the Largo zone."

The newly discovered Largo Zone is situated in the northeast corner of the large 22,000-hectare Chapitos property. Reconnaissance exploration work identified a significant zone of widespread, malachite stained andesites, from which 27 rock-chip samples were collected. Although selective in nature, the rock samples collectively averaged 1.55 % copper with individual samples up to 6.44 % copper, defining a 2.8 km by 1.8 km mineralized zone that remains open in all directions.

Camino will continue to evaluate this new discovery as part of the 2019 exploration program that will include detailed mapping, chip/channel and trench sampling, and geophysics in conjunction with work already planned for the recently discovered Lidia copper-gold zone (see March 28th news release). The discovery of these two new zones outside of the main Diva and Atajo Trends show the strong discovery potential of the Chapitos copper-gold project.

About Camino Minerals Corporation

Camino is a discovery-oriented mineral exploration company. The Company is focused on the acquisition and development of high-grade copper and precious metal projects. For more information, please refer to Camino's website at www.caminominerals.com.
