

Teras Provides Update to Shareholders

02.08.2019 | [Newsfile](#)

Calgary, August 2, 2019 - Teras Resources Inc. (TSXV: TRA.V) ("Teras" or the "Company") announces that it has entered into a Loan agreement for \$500,000. The Loan is secured against the assets of the company and will be repaid on or before January 31, 2020. Teras will provide a 4% interest in its Cahuilla project in return for the Loan. The 4% interest in Cahuilla can be purchased back by Teras at a later date on terms agreeable to both parties. The majority of the proceeds will be used to maintain the Company's lease payments as well as working capital.

Teras is in discussions with numerous companies and individuals on its Cahuilla and Montana projects and will update its shareholders when and if something is transacted.

About Teras

Teras is focused on developing its Cahuilla project located in Imperial County, California. The project encompasses an area of at least 3 km by 1.5 km and Teras believes that the Cahuilla project has the potential to develop into a mining operation consisting of altered and mineralized sedimentary host rocks with numerous sheeted high-grade sheeted quartz veins. Teras filed a NI 43-101 technical report with an indicated resource of 1.0 million ounces of gold and 11.9 million ounces of silver on its Cahuilla project (70 million tons at an average grade of 0.015 ounces per ton gold and 0.17 ounces per ton silver with a cut-off of 0.008 ounces per ton gold) and inferred class of 10 million tons grading 0.011 opt gold and 0.10 opt silver. Gold equivalent ounces are 1.2 million ounces in indicated class and 130,000 ounces in inferred class using a ratio of 55 silver ounces to 1 gold ounce. For further information on the Cahuilla project refer to the NI 43-101 technical report entitled "Cahuilla Property 43-101 Technical Report," filed with Sedar on November 27, 2012.

Dr. Dennis LaPoint, a qualified person under National Instrument 43-101 "Standards of Disclosure for Mineral Projects," and a Director for Teras is the Company's nominated qualified person responsible for monitoring the supervision and quality control of the programs completed on the Company's properties. Dr. LaPoint has reviewed and verified the mining, scientific and technical information contained in this news release. Dr. LaPoint is a registered geologist with the Society of Mining Engineers.

This news release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein may be forward-looking information. Generally, forward-looking information may be identified by the use of forward-looking terminology such as "plans" or "planning", " expects" or "does not expect", "proposed", "is expected", "budgets", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases, or by the use of words or phrases which state that certain actions, events or results may, could, would, or might occur or be achieved. In particular, this news release contains forward-looking information regarding: the potential use of proceeds of the financing,

including using the proceeds for maintaining and advancing the Cahuilla project. This forward-looking information reflects the Company's current beliefs and is based on information currently available to the Company and on assumptions the Company believes are reasonable. These assumptions include, but are not limited to: market acceptance of the use of proceeds for the financing; the actual results of exploration and development activities on the Company's projects being equivalent to or better than estimated results in technical reports or prior exploration and development results; the results of technical studies and new geological models meeting management's expectations; the Company's future costs and expenses being based on historical costs and expenses, adjusted for inflation; the ability of the Company to obtain acceptable financing; continued market acceptance of the Company's exploration programs and projects; consistent and favorable commodity prices; and regulatory and market acceptance of the Company's geologic models. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information. Such risks and other factors may include, but are not limited to: the early stage development of the Company and its projects; general business, economic, competitive, political and social uncertainties; commodity prices; the actual results of current exploration and development or operational activities; competition; changes in project parameters as plans continue to be refined; accidents and other risks inherent in the mining industry; lack of insurance; delay or failure to receive board or regulatory approvals; changes in legislation, including environmental legislation, affecting the Company; timing and availability of external financing on acceptable terms; conclusions of economic evaluations; and lack of qualified, skilled labour or loss of key individuals. A description of other assumptions used to develop such forward-looking information and a description of other risk factors that may cause actual results to differ materially from forward-looking information can be found in the Company's disclosure documents on the SEDAR website at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
