

# **GoGold Reports Financial Results for the Quarter ended June 30, 2019 and Provides Los Ricos Update**

08.08.2019 | [CNW](#)

Trading Symbol: TSX: GGD  
 Shares Outstanding: 171,901,481

HALIFAX, Aug. 8, 2019 - [GoGold Resources Inc.](#) (TSX: GGD) ("GoGold", "the Company") reports revenue of \$6.4 million for the second quarter of 2019. The Company sold 438,740 silver equivalent ounces sold at an average realized price of \$14.55. The Corporation closed the quarter with a strong financial position with \$9.0 million in cash and marketable securities and no debt. (All amounts are in U.S. dollars.)

Production in the quarter was a record 451,011 silver equivalent ounces, the second consecutive quarter that Parral has set a production record. Parral generated EBITDA of \$1,681,000 in the quarter, compared to a loss of \$59,000 in the quarter ended June 30, 2018.

"Parral continues to perform well, with another record production quarter completed, and we're seeing strong results through July and August," stated Brad Langille, President and CEO. "Leaching on the second lift is providing strong results, which is demonstrated by production growth and the increase in EBITDA from a year ago, with strong all-in costs of \$13.61 in the quarter and \$14.26 for the year to date. The SART project is on track, and once this is in operation in early 2020, we anticipate significant cost savings and cash inflows from liberated cyanide and copper that is currently in solution."

During the quarter, the Company recorded a decrease in the value of marketable securities of \$2.2 million, which is the largest contribution to the net loss of \$3.2 million on the quarter. For the year to date, the Company has recorded an increase in the value of marketable securities of \$2.0 million. The value of marketable securities has increased since quarter end by 15% as of the date of this press release.

#### Los Ricos

The Company is carrying out a 10,000m diamond drilling program of HQ size core in conjunction with a field program of mapping, sampling and trenching on the property. The program has focused on testing the top 200 metres of the mineralized zones to determine the potential for surface mining. This work includes "twinning" selected historical RC drill holes; completing new holes on 25m spaced "infill" sections; completing new deeper holes down dip beneath the historical RC drill holes; testing the potential extension of the deposit to the north of the underground workings; and stepping out 1500 metres to the south where the Company had success at initial greenfield exploration trenching.

"The drilling program at Los Ricos is providing very strong results and is intersecting substantial widths and grades of gold and silver. The option agreement on the project has allowed the Company to more fully understand the potential of this asset," said Brad Langille. "We see Los Ricos being a core asset and significant driver of value for GoGold."

As of June 30, 2019, the Company has spent \$1.2 million on exploration and the acquisition of the option agreement of the Los Ricos project. Currently, 44 holes totalling 5,914m of HQ size drill core have been completed, with assayed results recently reported for 26 drill holes. The table below shows some highlights of the drill results to date, see Appendix A for the full list of GoGold's drilling to date.

**CAUTIONARY STATEMENT:**

The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws, and may not be offered or sold within the United States or to, or for the benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except in compliance with the registration requirements of the U.S. Securities Act and applicable state securities laws or pursuant to exemptions therefrom. This release does not constitute an offer to sell or a solicitation of an offer to buy of any of GoGold's securities in the United States.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, the Los Ricos project, future operating margins, future production and processing, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral project. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.

Important factors that could cause actual results to differ materially from GoGold's expectations include exploration and development risks associated with GoGold's projects, the failure to establish estimated mineral resources or mineral reserves, volatility of commodity prices, variations of recovery rates, and global economic conditions. For additional information with respect to risk factors applicable to GoGold, reference should be made to GoGold's continuous disclosure materials filed from time to time with securities regulators, including, but not limited to, GoGold's Annual Information Form. The forward-looking information contained in this release is made as of the date of this release.

**Cautionary non-IFRS Measures and Additional IFRS Measures**

The Company believes that investors use certain non-IFRS and additional IFRS measures as indicators to assess mining companies. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared with IFRS. Non-IFRS and additional IFRS measures do not have a standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other companies.

Additional IFRS measures that are presented on the face of the Company's consolidated statements of comprehensive income include "Operating income (loss)". These measures are intended to provide an indication of the Company's mine and operating performance. "Cash flow from operating activities before changes in non-cash working capital" is a non-IFRS performance measure that could provide an indication of the Company's ability to generate cash flows from operations, and is calculated by adding back the change in non-cash working capital to "Net cash used in operating activities" as presented on the Company's consolidated statements of cash flows. Per ounce measures are calculated by dividing the relevant mining and processing costs and total costs by the ounces of metal sold in the period. "Cash costs per ounce" and "all-in sustaining costs per ounce" as used in this analysis are non-IFRS terms typically used by mining companies to assess the level of gross margin available to the Company by subtracting these costs from the unit price realized during the period. These non-IFRS terms are also used to assess the ability of a mining company to generate cash flow from operations. There may be some variation in the method of computation of these metrics as determined by the Company compared with other mining companies. In this context, "cash costs per ounce" reflects the cash operating costs allocated from in-process and dore inventory associated with ounces of silver and gold sold in the period. "Cash costs per ounce" may vary from one period to another due to operating efficiencies, grade of material processed and silver/gold recovery rates in the period. "All-in sustaining costs per ounce" include total cash costs, exploration, corporate and

administrative, share based compensation and sustaining capital costs. For a reconciliation of non-IFRS and IFRS measures, please refer to the Management Discussion and Analysis dated August 7, 2019, for the three and nine months ended June 30, 2019 as presented on SEDAR.
