

Marathon Gold Announces Q2 2019 Financial Results

12.08.2019 | [GlobeNewswire](#)

TORONTO, Aug. 12, 2019 - [Marathon Gold Corp.](#) (MOZ-TSX) (“Marathon”) announced today its financial results for the three and six months ended June 30, 2019. Following the completion of the updated preliminary economic assessment (“PEA”) on the Valentine Gold project in October 2018 and a successful financing transaction in February 2019, Marathon’s focus is on the development of the Valentine Gold project through the completion of a pre-feasibility study (“PFS”) and ultimately to a construction decision. The appointment of Matt Manson as President and Chief Executive Officer of Marathon effective August 19, 2019 strengthens the management team in areas that will be critical as the Company progresses from permitting and feasibility studies through to financing and mine development.

Highlights:

Sale of NSR to Franco-Nevada:

On February 21, 2019, Marathon completed the sale of a 2% net smelter returns royalty ("NSR") to Franco-Nevada and technical work through to completion of the PFS and was pursued rather than an equity financing to manage the debt at a cost of US \$7 million.

Financing and Liquidity:

At June 30, 2019, Marathon's cash position was \$15.8 million compared to \$3.7 million at December 31, 2018,

Infill drilling program:

Following on from successful 2018 drilling programs at the Marathon and Sprite deposits, Marathon's 2019 infill drilling programs at the Marathon and Sprite deposits with two concurrent objectives, both of which are directly connected to the Marathon and Leprechaun deposits:

- To further confirm Marathon's geological models for the Marathon and Leprechaun deposits by demonstrating the presence of mineralization in the corridors of the Marathon and Leprechaun deposits
- To increase measured and indicated resources for the project, both by continuing to upgrade existing inferred resources

To June 30, 2019 Marathon completed 109 holes covering 30,191 meters in the two deposits, representing approximately 10% of the total measured and indicated categories. Upon completion of the infill drilling program, Marathon will complete an updated resource estimate.

Metallurgy:

Marathon completed column testing on 12 samples of mineralized lower-grade material from the Leprechaun and Marathon deposits. The results for the Leprechaun Deposit and 65% for the Marathon Deposit. These results are well in excess of the 59% recoveries assumed in the PFS.

Mill recovery tests on higher grade material from the Leprechaun and Marathon deposits are continuing with encouraging results.

Environment and Stakeholder Engagement:

Marathon filed an Environmental Assessment ("EA") Registration/Project Description with the NL and federal governments for public review and comment and are reviewed by the various regulatory departments to determine the need for an Environmental Impact Statement ("EIS"). Various baseline studies and assessment-related work has been completed.

Marathon commenced formal stakeholder engagement in March 2019, beginning with public meetings in the closest communities on the status of the project and Marathon's plans. Subsequently, Marathon has commenced consultation with the NL and federal governments. Consultation with all stakeholders will continue as Marathon advances the EA, permitting, and engineering components.

Results of Operations:

The results of operations for the three and six months ended June 30, 2019 and 2018 are summarized below.

	Three months ended		Six months ended	
	June 30	June 30	June 30	June 30
	2019	2018	2019	2018
	\$	\$	\$	\$
Expenses:				
General and administrative expenses	762,299	378,315	1,345,478	861,111
Other income – royalties related to gold sales by the Golden Chest mine	(28,007)	(18,241)	(54,351)	(18,241)
Interest income	(69,424)	-	(96,942)	-
Interest expense	281	-	497	-
Foreign exchange loss (gain)	88	10,132	(6,499)	4,900
Loss before tax	665,237	370,206	1,188,183	848,111
Income tax expense (recovery)	88,171	175,403	192,955	(135,111)
Loss for the period	753,408	545,609	1,381,138	712,999

This press release should be read in conjunction with Marathon's condensed interim consolidated financial statements for the periods ended June 30, 2019 and 2018 and the related Management's Discussion and Analysis, both of which are available on www.sedar.com.

Cautionary Statement:

The updated PEA was prepared in accordance with NI 43-101. Readers are cautioned that the PEA is preliminary in nature. It includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the economic results reflected in the PEA will be realized. Mineral resources that are not mineral reserves do not have demonstrated economic viability.

Qualified Person:

This press release has been reviewed by Phillip Walford, P.Geo. Mr. Walford is a Qualified Person in accordance with NI 43-101 and has approved the contents of this press release on behalf of Marathon.

About Marathon

Marathon is a Toronto based gold company rapidly advancing its 100%-owned Valentine Gold Camp located in Newfoundland and Labrador, one of the top mining jurisdictions in the world. Marathon has confirmed the feasibility of the Valentine Gold Camp, which currently hosts four near-surface NI 43-101 compliant, mainly pit-shell constrained, deposits with measured resources totaling 16.6 million tonnes at a grade of 2.18 g/t containing 1,166,500 oz. of gold, indicated resources totaling 28.5 million tonnes at a grade of 1.66 g/t containing 1,524,900 oz. of gold and inferred resources totaling 26.9 million tonnes at a grade of 1.77 g/t containing 1,531,600 oz. of gold.

The majority of the resources occur in the Marathon and Leprechaun deposits, which also have resources below the current open pit shell. Both deposits are open at depth and on strike. Gold mineralization has been traced down almost a kilometer vertically at Marathon and over 350 meters at Leprechaun. The four deposits identified to date occur over a 20-kilometer system of gold bearing veins, with much of the 24,000-hectare property having had only minimal exploration activity to date.

The Valentine Gold Camp is accessible by year-round road and is in close proximity to the provincial electrical grid. Marathon maintains a 50-person all-season camp at the property. Recent metallurgical tests have demonstrated 93% to 98% recoveries via conventional milling and an average of 65 to 72% extraction rates for 23 mm (1/2 inch) material via lower cost heap leaching at the Marathon and Leprechaun Deposits respectively.
