

Great Bear to Host a Webinar on Wednesday September 4th @ 8:00am PDT/11:00am EDT to Provide Update on Dixie Drill Program

15.08.2019 | [CNW](#)

TSX-V: GBR

VANCOUVER, Aug. 15, 2019 - Great Bear Resources (the "Company" or "Great Bear", TSX-V: GBR) would like to invite interested shareholders to join Mr. Chris Taylor, President and CEO and Mr. R. Bob Singh, Vice President, Exploration for a webinar detailing recent progress in the Company's ongoing fully-funded 90,000 metre drill program at its 100% owned Dixie property in the Red Lake district of Ontario.

The webinar will take place on Wednesday, September 4th at 8:00am PST/11:00am EST. Management will be available to answer questions following the presentation. Online registration and participation details may be found at the following link:

<https://attendee.gotowebinar.com/register/7498183718142686465?source=GBR1>

For those unable to participate, a recording of the webinar will be posted to the Company's web site following the live broadcast.

About Great Bear

[Great Bear Resources Ltd.](#) (TSX-V: GBR) is a well-financed company based in Vancouver, Canada, managed by a team with a track record of success in the mineral exploration sector. Great Bear holds a 100% interest, royalty free, in its flagship Dixie property, which is road accessible year-round via Highway 105, a 15 minute drive from downtown Red Lake, Ontario. The Red Lake mining district is one of the premier mining districts in Canada, benefitting from major active mining operations including the Red Lake Gold Mine of Newmont Goldcorp Corp., plus modern infrastructure and a skilled workforce. Production from the Red Lake district does not necessarily reflect the mineralization that may, or may not be hosted on the Company's Dixie property. The Dixie property covers a drill and geophysically defined multi kilometre gold mineralized structure similar to that associated with other producing gold mines in the district. In addition, Great Bear is also earning a 100% royalty-free interest in the Pakwash, Dedee and Sobel properties, which cover regionally significant gold-controlling structures and prospective geology. All of Great Bear's Red Lake projects are accessible year-round through existing roads.

Drill core is logged and sampled in a secure core storage facility located in Red Lake Ontario. Core samples from the program are cut in half, using a diamond cutting saw, and are sent to SGS Canada Inc. in Red Lake, Ontario, and Activation Laboratories in Ancaster, Ontario, both of which are accredited mineral analysis laboratories, for analysis. All samples are analysed for gold using standard Fire Assay-AA techniques. Samples returning over 10.0 g/t gold are analysed utilizing standard Fire Assay-Gravimetric methods. Selected samples with visible gold are also analyzed with a standard 1 kg metallic screen fire assay. Certified gold reference standards, blanks and field duplicates are routinely inserted into the sample stream, as part of Great Bear's quality control/quality assurance program (QAQC). No QAQC issues were noted with the results reported herein.

Mr. R. Bob Singh, P.Geo, Director and VP Exploration, and Ms. Andrea Diakow P.Geo, Exploration Manager for Great Bear are the Qualified Persons as defined by National Instrument 43-101 responsible for the accuracy of technical information contained in this news release.

ON BEHALF OF THE BOARD

"Chris Taylor"

Chris Taylor, President and CEO
