

# Tahuehueto Toll Milling Produces Highest Recoveries to Date at 86% Gold, 85% Silver, 86% Lead, 77% Zinc and 84% Copper

28.08.2019 | [The Newswire](#)

Vancouver, British Columbia - TheNewswire - August 28, 2019 - [Telson Mining Corp.](#) ("Telson" or the "Company" (TSXV:TSN) (OTC:SOHFF) (Frankfurt:TSGN) (formerly SQ82)) is pleased to announce that significant recoveries have been achieved in the first week of processing Tahuehueto pre-production ore at the third party Atocha Toll Mill.

Up to August 25 inclusive, just over 2,100 tonnes of concentrate has been processed over a six-day period with average head grades of 5.32 g/t Au, 38.03 g/t Ag, 1.71% Pb, 3.20% Zn and 0.24% Cu.

"Management is delighted to report that Telson's 11th Tahuehueto toll milling campaign is proceeding better than expected with just under half of the anticipated 5,000+ tonnes of ore processed to date. Average metal recoveries achieved in the first half of the campaign stand at 86.29% gold, 85.60% silver, 86.80% lead, 76.93% zinc and 84.21% copper. These recoveries are a significant improvement over previously processed toll mill campaigns" states Antonio Berlanga, CEO of Telson. "Furthermore, this processing has produced high quality, precious metal rich concentrates with the lead concentrate containing an average of 101 grams gold/tonne and 702 grams silver/tonne.

To date, the toll milling campaign has processed 2,166 tonnes of Tahuehueto ore producing;

- - 82.9 tonnes of gold rich lead concentrate grading 101 grams gold/tonne (3.2 troy ounces), 702.44 grams silver/tonne (23 troy ounces), 38.8% lead and 5.29% copper
- 130.8 tonnes of zinc concentrate grading 40.82% zinc, 12.02 grams gold/tonne, 93.94 grams silver/tonne

Telson anticipates that it will process at least 5,000 tonnes of ore during this 11th campaign and intends to continue to deliver Tahuehueto ore to the Atocha Toll Mill throughout the rest of 2019 which should allow the Company to process at least one campaign of between 3,000 to 5,000 tonnes on a monthly basis until it has completed construction of its on-site 1,000 tonne per day mining facility.

## About Telson Mining Corporation

[Telson Mining Corp.](#) is a Canadian based mining company with two 100% owned Mexican gold, silver and base metal mining projects.

Telson's Tahuehueto mining project, located in north-western Durango State, Mexico is currently under development and waiting for final funding to complete construction of the processing plant and related assets to produce concentrates in its own on-site mineral processing plant, with a designed capacity of at least 1,000 tonnes per day, targeting completion of construction near end of Q1 2020.

Campo Morado is a polymetallic base metal mine with mining and milling equipment capable of producing up to 2,500 tons per day; which has been placed into care and maintenance pending better economic conditions and community relationships allowing for a restart of mining operations.

#### Cautionary Note Regarding Production Decisions and Forward-Looking Statements

Statements contained in this news release that are not historical facts are "forward-looking information" or "forward-looking statements" (collectively, "Forward-Looking Information") within the meaning of applicable Canadian securities laws. Forward Looking Information includes, but is not limited to, disclosure regarding possible events, conditions or financial performance that is based on assumptions about future economic conditions and courses of action; the timing and costs of future activities on the Company's properties, such as production rates and increases; success of exploration, development and bulk sample processing activities, and timing for processing at its own mineral processing facility on the Tahuehueto project site. In certain cases, Forward-Looking Information can be identified by the use of words and phrases such as "plans", "expects", "scheduled", "estimates", "forecasts", "intends", "anticipates" or variations of such words and phrases. In preparing the Forward-Looking Information in this news release, the Company has applied several material assumptions, including, but not limited to, that the current exploration, development, environmental and other objectives concerning the Campo Morado Mine and the Tahuehueto Project can be achieved, the continuity of the price of gold and other metals, economic and political conditions and operations. Forward-Looking Information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the Forward-Looking Information. There can be no assurance that Forward-Looking Information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on Forward-Looking Information. Except as required by law, the Company does not assume any obligation to release publicly any revisions to Forward-Looking Information contained in this news release to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
