# Gatling Extends Bear Deposit 200 m with 10.6 g/t Au over 5.0 m at Larder Gold Project

06.09.2019 | CNW

VANCOUVER, Sept. 6, 2019 - <u>Gatling Exploration Inc.</u> (TSXV: GTR, OTC: GATGF) (the "Company" or "Gatling") is ple report new high-grade results from its largest step-out drill hole to date at the Bear deposit, including 10.6 g/t Au over 5 This step-out hole expands the high-grade mineralization at the Bear deposit 200 meters west towards the Cheminis de a result, the North Zone at the Bear deposit has now reached 600 meters along strike.

Nathan Tribble, VP Exploration for Gatling, stated, "Hitting such strong grades with our biggest step out to date is extre encouraging. The successful results also represent the start of a new phase of step out drilling, designed to test the the our three deposits – Fernland, Cheminis and Bear – are all connected as one, very large mineralized sys

#### Results from drill holes

Hole ID From (m) To (m) Length (m) Au (g/t) Zone

GTR-19-009811.0 816.0 5.0 10.6 North

916.0 917.0 1.0 1.2 South Flow

# Highlights

- Largest Step Out to Date. GTR-19-009 extended the North zone 200 meters west with multiple occurrences of visit returning values of 10.6 g/t Au over 5.0 meters (Figure 1).
- Step Out Drilling Campaign. Drilling at the Bear deposit has now entered a new expansion phase and will continu
  strategically step-out west along the Cadillac-Larder Break towards Cheminis. Gatling believes that the Fernland,
  and Bear deposits are part of one continuous system (Figure 3). This phase of exploration will continue to explore
  previously untested areas along strike of known mineralization.
- Bear Deposit Resource. The 2011 inferred resource completed on the Bear deposit is 683,600 Au oz at 5.69 g/t A
  are three main zones (North, Ultramafic, and South Flow) that comprise the total resource. Gatling has over 30,00
  of completed drilling that has not been included in this resource and will be utilized in future models.
- Bear Deposit Extension. The Bear deposit is made up of three main mineralized zones with current dimensions o 600 meters in strike and over 850 meters at depth (Figure 2). With strong continuity throughout all 3 zones, Gatlir continue to test the extension of mineralization as drilling continues.

**Further Details** 

GTR-19-009

The North zone displays strong silica-sericite-graphite alteration with cross cutting veins and brecciated texture through upper and lower contacts are both sharp and the North zone has multiple occurrences of visible gold (Figure 1).

<sup>\*</sup>Stated lengths are core lengths as drilled. True widths are estimated to be 60 to 80% of reported core length intervals.

#### Drill hole locations

Hole ID	Azimuth	Dip	Length (m)	UTM East	UTM North	Elev (m)
GTR-19-009	180	-67	1073	600750	5330946	329

#### QA/QC

Drill core is logged and sampled at the Larder project site. Core samples from the program are cut in half, using a diam cutting saw with half sent for assay at ActLabs in Timmins, Ontario. The other half is secured and retained on site. All s are analyzed for gold using standard Fire Assay-AA techniques. Samples returning greater than 5.0 g/t gold are analyz utilizing standard Fire Assay-Gravimetric methods. Certified reference standards and blanks are routinely inserted into sample stream as part of Gatling's quality control/quality assurance program.

# **About Gatling Exploration**

Gatling Exploration is a Canadian gold exploration company focused on advancing the Larder Gold Project, located in the Abitibi greenstone belt in Northern Ontario. The Larder property hosts three high-grade gold deposits along the Cadillac Lake Break, 35 kilometers east of Kirkland Lake. The project is 100% controlled by Gatling and is comprised of patente unpatented claims, leases and mining licenses of occupation within the McVittie and McGarry Townships. The 3,370-he project area is positioned 7 kilometers west of the Kerr Addison Mine, which produced 11 million ounces of gold. All particularly are accessible by truck or all-terrain vehicles on non-serviced roads and trails.
