In essence the company explains the importance of having nearby producing gold mines and the importance of our latest achievements. This One Pager Circular also does emphasize on the fact that we have an Exploration Budget and that we are ready to present a NI 43-101 in the near future.

The company is not planning to complete a REVERSE SPLIT at this moment and is not in the company's plans to do this. NO DILUTION is guaranteed as our latest DTCC Share Position Report shows that the company has 149,811,161 common shares in the float. Just clarifying that this number is the actual Float as it has been mentioned numerous occasions lately. We are also working on preparing Financial Statements in order to remove the Stop Sign.

Gold has always been a valuable investment and as the Fed continues its hike in interest rates, we foresee a significant opportunity in 2019 as prices are projected to surge past \$1,650 an ounce over this year. As gold prices begin to trend upwards, investors will begin to flock to the haven of physical gold and mining companies producing the ever-sought-after mineral.

The company will make further announcements on its other project as progress is made.

[Tamino Minerals Inc.](#) is exploring for high-grade gold deposits within a prolific gold producing geologic state, Sonora

On behalf of the Board,

Pedro Villagran-Garcia, President & CEO
