QMC Drills 2.95% Li2O at Irgon Dike

11.09.2019 | Newsfile

Vancouver, September 11, 2019 - QMC Quantum Minerals Corp., (TSXV: QMC) (FSE: 3LQ) (OTC Pink: QMCQF) ("QMC" or "the Company") is pleased to report initial assay results from the 2019 drill program on the Company's 100% owned Irgon Lithium Mine Project located within the prolific Cat Lake-Winnipeg River rare-element pegmatite field of S.E. Manitoba. This pegmatite field also hosts Sinomine Resource's nearby Tantalum Mining Corporation of Canada ("TANCO") rare-element pegmatite (formerly owned by Cabot Corporation).

President and chief executive officer of QMC Minerals Balraj Mann stated: "We are extremely pleased with the current results as they confirm significant high-grade spodumene mineralization continues to depth. Spodumene mineralization was present in all holes. The best assay was in drill hole IR-19-06 which reported 2.95% Li_2O over 0.75m and followed closely by drill hole IR 19-09 which returned 2.87% Li_2O over 1.25m. The data received to date are currently being utilized by SGS Canada to prepare a resource estimate on the property. The recent acquisition of the TANCO Lithium Mine by Sinomine Resource Group presents QMC the opportunity to have material processed at the TANCO facility."

Highlights:

- IR-19-09 returned 3.65 metres of 1.85% Li_2O, including 2.46% Li_2O, 87 ppm tantalum, 26 ppm cesium and 49 ppm niobium over 2.51 metres.
- IR-19-01 returned 9.75 metres of 1.29% Li_2O, including 1.50% Li_2O, 300 ppm tantalum, 47 ppm cesium and 82 ppm niobium over 2.51 metres.

Drill Hole	Drill Intercept			
(No.)	From (m)	To (m)	Width (m)	Li2O (%
• Best individual sample interval:				
IR-19-06	77.0	77.75	0.75	2.95
• The intersection with the best grade:				
IR-19-09	46.1	49.75	3.65	1.85
Including	47.24	49.75	2.51	2.46
• The widest intersection:				
IR-19-03	39.95	60.30	20.35	1.00
• The overall best intersection (width/grade)				
IR-19-01	121.8	132.55	9.75	1.29
Including	123.7	130.90	7.85	1.30

About TANCO

Shanghai-based Sinomine Resource Group ("Sinomine") recently acquired from Cabot Corporation its specialty fluids business which includes the TANCO Lithium Mine. Sinomine paid US$135 million plus a royalty of up to US$5 million for lithium products processed.

About the Company

QMC is a British Columbia based company engaged in the business of acquisition, exploration and development of resource properties. Its objective is to locate and develop economic precious, base, rare metal and resource properties of merit. The Company's properties include the Irgon Lithium Mine project and two VMS properties, the Rocky Lake and Rocky-Namew, known collectively as the Namew Lake District Project. Currently, all of the company's properties are located in Manitoba.
