

Kootenay Completes Surface Access Agreement on the Copalito Silver-Gold Project, Mexico

03.10.2019 | [CNW](#)

VANCOUVER, Oct. 3, 2019 - [Kootenay Silver Inc.](#) (TSXV: KTN) (the "Company" or "Kootenay") is pleased to announce that the Company has signed a surface access agreement (the "Agreement") with the local Ejido at the Copalito Project ("Copalito Property") located in the State of Sinaloa, Mexico.

The Agreement allows Kootenay full surface access to the land that covers the gold and silver epithermal vein system and surrounding exploration potential at Copalito. The Agreement also allows the Company to conduct exploration activities including but not limited to mapping, sampling, geophysics, trenching and drilling.

Kootenay is currently in the process of filing necessary permit applications with the government to conduct a maiden drill program with the expectation of permits being issued by the end of the year. The Company has retained the services of an environmental consultant to assist in and expediate the process. Updates on permitting and the proposed drilling program for Copalito will be reported in future news releases.

Copalito covers a gold and silver epithermal vein system comprised of numerous veins, with individual veins currently to strike lengths of up to two (2) kilometers. Veins vary in width from 0.5 to 15 meters at surface. Exploration efforts by the Company to date have been focused on six (6) known principal veins discovered by Kootenay, with results previously reported over the past year (see Company's news releases dated July 19 and September 20, 2018, January 21 and April 10, 2019).

Copalito Sampling Highlights:

- 7.2 gpt gold and 3,770 gpt silver in grab samples from 5 Senores and Agua Veins, respectively;
- 8.2 gpt gold including 583 gpt silver over a 1.1-meter chip sample across the 5 Senores Vein;
- 401 gpt silver including 0.24 gpt gold in a chip sample across 5.3 meters on 5 Senores Vein;
- 532 gpt silver over 3.0 meters and 306 gpt silver over 4.9 meters chip sampled across Agua Vein;
- 17.45% zinc, 9.89% lead, 76 gpt silver and 0.52 gpt gold in a grab sample taken at Pillar Vein; and
- Copper values of 5.1%, 1.6 % and 1.5% taken from the northern area of the Property along the Cobriza Vein

Copalito Geology

Mineralization is hosted within classic low sulfidation epithermal quartz and rare calcite veins. Multiple mineral events are evidenced by banded mineralized textures, multiple cross cutting veins/veinlets, laminated banding of chalcedonic and quartz, sulfide replacement and infillings of breccia matrix. Sulfide content is generally low but does range to 20% or more in some samples. Sulfides and their oxide equivalents include fine grained pyrite, black and yellow sphalerite, galena, chalcocite, silver sulphosalts. Some zonation is becoming apparent with veins in the northeast being higher in gold and base metals and those in the south being high in silver and low in base metals.

About Copalito Silver-Gold Project

The Copalito Project is a classic low sulphidation epithermal vein system which has numerous small old workings and reports of historic exploration drilling. The Property consists of seven concessions totaling approximately 3,700 hectares located 35 kilometres east of McEwen Mining's "El Gallo Mine" complex in Sinaloa State, along the western fringes of the Madre Occidental in northwestern Mexico. The Copalito Project has good access, topography and infrastructure. Kootenay's wholly owned Mexican subsidiary can acquire a 100% ownership in the concessions by making staged payments over a 10-year period.

Sampling and QA/QC

Surface samples reported herein are a combination of grab, chip and panel chip. All technical information for the Copalito exploration program is obtained and reported under a formal quality assurance and quality control ("QA/QC") program. Samples are taken under the direction of qualified geologists. Samples are then labeled placed in plastic bags, sealed and with location and sample numbers recorded. Samples are delivered by the Company via courier to ALS Minerals ("ALS") in Vancouver, British Columbia. The samples are dried, crushed and pulverized with the pulps being sent airfreight for analysis by ALS in Vancouver, British Columbia. Systematic assaying of standards, blanks and duplicates is performed for precision and accuracy. Analysis for silver, zinc and copper and related trace elements was done by ICP four acid digestion, with gold analysis by 30-gram fire assay with lead finish.

Qualified Persons

The Kootenay scientific and technical information in this news release has been prepared in accordance with the Canadian regulatory requirements set out in National Instrument 43-101 (Standards of Disclosure for Mineral Projects) and reviewed and approved on behalf Kootenay by James McDonald, P.Geol., President, CEO & Director for Kootenay, a Qualified Person.

About Kootenay Silver Inc.

[Kootenay Silver Inc.](#) is an exploration company actively engaged in the discovery and development of mineral projects in the Sierra Madre Region of Mexico and in British Columbia, Canada. Supported by one of the largest portfolios of silver assets in Mexico, Kootenay continues to provide its shareholders with significant leverage to silver prices. The Company remains focused on the expansion of its current silver resources, new discoveries and the near-term economic development of two of its silver projects located in prolific mining districts in Sonora, State and Chihuahua, State, Mexico, respectively.

On Behalf of the Board of Directors of

KOOTENAY SILVER INC.

CAUTIONARY NOTES:

The sampling results disclosed in this news release are not necessarily indicative and drilling is required to confirm a mineral deposit.

The information in this news release has been prepared as at October 2, 2019. This news release contains "forward-looking information" within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, "forward-looking statements"). All statements other than statements of historical fact, that address activities, events or developments that [Kootenay Silver Inc.](#) ("Kootenay" or the "Company") believes, expects or anticipates will or may occur in the future including, without limitation, the anticipated results from exploration activities, the discovery and delineation of mineral deposits and sampling results from the Copalito Project and other properties, the anticipated content, commencement, and cost of exploration programs in respect of the Company's projects and mineral properties, the anticipated business plans and timing of future activities of the Company, capital expenditures (including the amount and nature thereof), business strategies and measures to implement strategic competitive strengths, goals, expansion and growth of the business and operations, plans and references to the future of the Company, and such other matters, are forward-looking statements. These forward-looking statements reflect the current expectations or beliefs of the Company based on information currently available to Kootenay and often use words such as "expects", "plans", "anticipates", "estimates", "believes", "intends", "potential", "may" or variations thereof or the negative counterparts of these terms.

Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements and, even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, Kootenay.

Factors that could cause actual results or events to differ materially from current expectations include, among other things, the ability of the Company to obtain sufficient financing to fund its business activities and plans, operating and technical difficulties in connection with mineral exploration and development and mine development activities for Company's projects generally, the results of exploration activities (including the estimation or realization of mineral reserves and mineral resources), the timing and amount of estimated future production, costs of production, capital expenditures, the costs and timing of the development of mineral deposits, the availability of a sufficient supply of water and other materials, requirements for additional capital, future production of copper and silver, changes in general economic conditions, changes in the financial markets and in the demand and market prices for commodities, possible variations in ore grade or recovery rates, possible failures of plants, equipment or processes to be anticipated, accidents, labour disputes and other risks of the mining industry, delays in obtaining governmental and regulatory approvals (including of the TSX Venture Exchange), permits or financing or in the completion of development or construction activities, changes in laws, regulations and policies affecting mining operations, hedging practices, currency fluctuations, legal disputes or claims limitations on insurance coverage and the timing and possible outcome of pending litigation, environmental issues and liabilities, risks related to joint venture operations, and risks related to the integration of acquisitions, as well as other factors discussed under "Risk Factors" in the Company's most recent annual management's discussion and analysis and other filings of the Company with the Canadian Securities Administrators, copies of which can be found under the Company's profile on the SEDAR website at www.sedar.com.

Any forward-looking statement speaks only as of the date on which it was made, and except as may be required by applicable securities laws, Kootenay disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Although Kootenay believes that the assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to their inherent uncertainty. There can be no assurance that forward-looking statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements.

Cautionary Note to US Investors: This news release may contain information about adjacent properties on which we have the right to explore or mine. We advise U.S. investors that the SEC's mining guidelines strictly prohibit information of this type in a filing with the SEC. U.S. investors are cautioned that mineral deposits on adjacent properties are not indicative of mineral deposits on our properties. This news release may contain forward-looking statements including but not limited to comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral reserves, etc. Forward-looking statements address future events and conditions and therefore involve inherent risks and uncertainties. Actual results may differ materially from those currently anticipated in such statements.
