

Platinum Group Metals Ltd. Announces Non-Brokered Private Placement

11.12.2019 | [Newsfile](#)

Vancouver, December 11, 2019 - Platinum Group Metals Ltd. (TSX: PTM) (NYSE American: PLG) ("Platinum Group" or the "Company") reports that the Company intends, subject to regulatory approval, to offer and sell an aggregate 1,613,683 common shares of the Company at price of US\$1.24 each for gross proceeds of US\$2.0 million (the "Private Placement"). An existing major beneficial shareholder of the Company, Hosken Consolidated Investments Limited, is expected to participate in the Private Placement.

The Company intends to use the net proceeds of the Private Placement for its share of costs on the Waterberg Project and for general corporate and working capital purposes. Closing of the Private Placement is subject to customary closing conditions, including stock exchange approvals.

Securities purchased pursuant to the Private Placement may not be traded for a period of four months plus one day from the closing of the Private Placement. The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933 (the "Act"), as amended, and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons absent registration or an applicable exemption from the registration requirements of such Act.

About Platinum Group Metals Ltd. and Waterberg Project

[Platinum Group Metals Ltd.](#) is the operator of the Waterberg Project, a bulk underground palladium, platinum, gold and rhodium ("PGM") deposit located in South Africa. An independent Definitive Feasibility Study for the Waterberg Project, published on September 24, 2019, concludes the Waterberg Project will be a fully mechanised, shallow, decline-accessed mine and will be one of the largest and potentially lowest cash cost underground PGM mines globally.

The Waterberg Project was discovered by Platinum Group and is being jointly advanced with the shareholders of Waterberg JV Resources (Pty) Limited ("Waterberg JV Co."), being Platinum Group, [Impala Platinum Holdings Ltd.](#), Japan Oil, Gas and Metals National Corporation, Hanwa Co. Ltd. and Mnombo Wethu Consultants (Pty) Ltd.

On behalf of the Board of
Platinum Group Metals Ltd.

Disclosure

The Toronto Stock Exchange and the NYSE American have not reviewed and do not accept responsibility for the accuracy or adequacy of this news release, which has been prepared by management.

This press release contains forward-looking information within the meaning of Canadian securities laws and forward-looking statements within the meaning of U.S. securities laws (collectively "forward-looking statements"). Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, plans, postulate and similar expressions, or are those, which, by their nature, refer to future events. All statements that are not statements of historical fact are forward-looking statements. Forward-looking statements in this press release include, without limitation, statements regarding the size, participating in, receipt of regulatory approvals for, and the completion and amount and use of proceeds of the Private Placement; development of the Waterberg Project; and that the Waterberg Project will be a fully mechanised, shallow, decline-accessed mine and will be one of the largest and potentially lowest cash cost underground PGM mines globally. Although the Company believes the forward-looking statements in this press release are reasonable, it can give no assurance that the expectations and assumptions in such statements will prove to be correct.

The Company cautions investors that any forward-looking statements by the Company are not guarantees of future results or performance and that actual results may differ materially from those in forward-looking statements as a result of various factors, including the Company's inability to obtain subscriptions for and complete the Private Placement on the terms disclosed above, or at all, or to obtain required regulatory approvals for the Private Placement; the Company's inability to generate sufficient cash flow or raise sufficient additional capital to make payment on its indebtedness, and to comply with the terms of such indebtedness; additional financing requirements; the Company's credit facility is, and any new indebtedness may be, secured and the Company has pledged its shares of Platinum Group Metals (RSA) Proprietary Limited ("PTM RSA"), and PTM RSA has pledged its shares of Waterberg JV Co. to the lenders under such facility, which potentially could result in the loss of the Company's interest in PTM RSA and the Waterberg Project in the event of a default under the credit facility or any new secured indebtedness; the Company's history of losses and negative cash flow; the Company's ability to continue as a going concern; Implats may not exercise its option; the Company's properties may not be brought into a state of commercial production; uncertainty of estimated production, development plans and cost estimates for the Waterberg Project; discrepancies between actual and estimated mineral reserves and mineral resources, between actual and estimated development and operating costs, between actual and estimated metallurgical recoveries and between estimated and actual production; fluctuations in the relative values of the U.S. Dollar, the Rand and the Canadian Dollar; volatility in metals prices; the Company may become subject to the U.S. Investment Company Act; the failure of the Company or the other shareholders to fund their pro rata share of funding obligations for the Waterberg Project; any disputes or disagreements with the other shareholders of Waterberg JV Co. or Mnombo Wethu Consultants (Pty) Ltd.; the ability of the Company to retain its key management employees and skilled and experienced personnel; conflicts of interest; litigation or other administrative proceedings brought against the Company; actual or alleged breaches of governance processes or instances of fraud, bribery or corruption; exploration, development and mining risks and the inherently dangerous nature of the mining industry, and the risk of inadequate insurance or inability to obtain insurance to cover these risks and other risks and uncertainties; property and mineral title risks including defective title to mineral claims or property; changes in national and local government legislation, taxation, controls, regulations and political or economic developments in Canada and South Africa; equipment shortages and the ability of the Company to acquire necessary access rights and infrastructure for its mineral properties; environmental regulations and the ability to obtain and maintain necessary permits, including environmental authorizations and water use licences; extreme competition in the mineral exploration industry; delays in obtaining, or a failure to obtain, permits necessary for current or future operations or failures to comply with the terms of such permits; risks of doing business in South Africa, including but not limited to, labour, economic and political instability and potential changes to and failures to comply with legislation; the Company's common shares may be delisted from the NYSE American or the TSX if it cannot maintain or regain compliance with the applicable listing requirements; and other risk factors described in the Company's most recent Form 20-F annual report, annual information form and other filings with the U.S. Securities and Exchange Commission ("SEC") and Canadian securities regulators, which may be viewed at www.sec.gov and www.sedar.com, respectively. Proposed changes in the mineral law in South Africa if implemented as proposed would have a material adverse effect on the Company's business and potential interest in projects. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise.

Estimates of mineralization and other technical information included herein and in the Definitive Feasibility Study for the Waterberg Project have been prepared in accordance with NI 43-101. The definitions of proven and probable reserves used in NI 43-101 differ from the definitions in SEC Industry Guide 7. Under SEC Industry Guide 7 standards, mineralization may not be classified as a "reserve" unless the mineralization can be economically and legally extracted or produced at the time the "reserve" determination is made. As a result, the reserves reported by the Company in accordance with NI 43-101 may not qualify as "reserves"

under SEC Industry Guide 7. In addition, the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and historically have not been permitted to be used in reports and registration statements filed with the SEC pursuant to SEC Industry Guide 7. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into reserves. In particular, "inferred mineral resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Disclosure of "contained ounces" in a resource is permitted disclosure under NI 43-101; however, SEC Industry Guide 7 normally only permits issuers to report mineralization that does not constitute "reserves" by SEC Industry Guide 7 standards as in-place tonnage and grade without reference to unit measures. Accordingly, descriptions of the Company's mineral deposits in this press release may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements of SEC Industry Guide 7.
