

ShaMaran Atrush Update

16.12.2019 | [CNW](#)

VANCOUVER, Dec. 16, 2019 - [ShaMaran Petroleum Corp.](#) ("ShaMaran" or the "Company") (TSX VENTURE: SNM) (NASDAQ FIRST NORTH GROWTH MARKET: SNM) is pleased to report that the Atrush Field has achieved its first day of production at 50,000 barrels since production began in 2017. [View PDF version.](#)

The current production volumes are subsequent to the completion of CK-15, Atrush's fourth new production well drilled in 2019. CK-15 came online on the 10th of December and is currently producing at rates over 6,000 barrels per day. Atrush's annual daily production capacity increased by over 20,000 bopd since the same period in 2018.

ShaMaran President and Chief Executive Officer Dr. Adel Chaouch commented, "The successful completion of a sustained drilling campaign combined with the fast-track deployment of additional processing capacity allowed the field to reach the daily production rate of 50,000 barrels. This key production achievement demonstrates that Atrush continues to deliver on its commitments; and provides ShaMaran with a strong organic growth base."

The Company reiterates its Atrush 2019 average daily production guidance of between 30,000 and 35,000 bopd and a target 2019 exit rate between 45,000 bopd and 50,000 bopd. The Company shares in this production, pursuant to a production sharing contract, with a working interest of 27.6%.
