

Hecla Ramping up Lucky Friday to Full Production

17.12.2019 | [Business Wire](#)

Union not returning to work; Company hiring workers and contractors

[Hecla Mining Company](#) (NYSE:HL) today announced that the union workers have voted not to ratify the Tentative Agreement reached by the USW and Hecla negotiating committees. The Company is committed to bringing the mine back to full production and is increasing the hiring of employees and contractors.

“For much of 2019 we have employed a number of hourly workers who, combined with our salaried workforce, have operated the Lucky Friday on a limited basis,” said Phillips S. Baker, Jr., President and CEO. “We will now accelerate hiring and utilizing contractors with the goal of reaching full production by year-end 2020. While we would have preferred ratification of the agreement reached by the two negotiating committees, after three years of negotiating we believe the best interests of the company and community is the Lucky Friday in full operation. The mine has operated for 75 years, and we believe its best days with projected higher grades and more cash flow, are in front of it.”

“I want to acknowledge the existing salaried and hourly staff at the Lucky Friday, who kept the mine operating during the strike and in doing so have helped minimize the financial impact. But most importantly, they have operated in a very safe manner, and were recognized for their efforts by receiving the highest mine safety award in the United States, the Sentinels of Safety from the National Mining Association, earlier this fall,” Mr. Baker continued.

ABOUT HECLA

Founded in 1891, [Hecla Mining Company](#) (NYSE:HL) is a leading low-cost U.S. silver producer with operating mines in Alaska, Idaho and Mexico, and is a growing gold producer with operating mines in Quebec, Canada and Nevada. The Company also has exploration and pre-development properties in eight world-class silver and gold mining districts in the U.S., Canada, and Mexico.

Cautionary Statements Regarding Forward Looking Statements

This release contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian securities laws. When a forward-looking statement expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the forward-looking statements. Forward-looking statements often address our expected future business and financial performance and financial condition; and often contain words such as “anticipate,” “intend,” “plan,” “will,” “could,” “would,” “estimate,” “should,” “expect,” “believe,” “project,” “target,” “indicative,” “preliminary,” “potential” and similar expressions. Forward-looking statements in this news release may include, without limitation: (i) the ability of Lucky Friday to return to full production by year end 2020; (ii) the ability of the mine to ramp up in a safe and orderly manner; (iii) the mine can generate higher grades and cash flow in the future; and (iv) the ability to hire sufficiently trained contract workers to bring the mine back to full production. The material factors or assumptions used to develop such forward-looking statements or forward-looking information include that the Company’s plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated, to which the Company’s operations are subject.

Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect, which could cause actual results to differ from forward-looking statements. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain price assumptions for gold, silver, lead and zinc; (v) prices for key supplies being approximately consistent with current levels; (vi) the accuracy of our current mineral reserve and mineral resource estimates; (vii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated; (viii) sufficient workforce is available and trained to perform assigned tasks; (ix) factors do not arise that reduce available cash balances, and (x) there being no material increases in our current requirements to post or maintain reclamation and performance bonds or collateral related thereto.

In addition, material risks that could cause actual results to differ from forward-looking statements include, but are not limited to: (i) gold, silver and other metals price volatility; (ii) operating risks; (iii) currency fluctuations; (iv) increased production costs and variances in ore grade or recovery rates from those assumed in mining plans; (v) community relations; (vi) conflict resolution and outcome of projects or oppositions; (vii) litigation, political, regulatory, labor and environmental risks; (viii) exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration; and (ix) we are unable to remain in compliance with all terms of the credit agreement in order to maintain continued access to the revolver. For a more detailed discussion of such risks and other factors, see the Company's 2018 Form 10-K, filed on February 22, 2019, and Form 10-Qs filed on May 9, 2019 and August 7, 2019 with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-looking statements" is at investors' own risk.
