

PolyMet reviewing options after Minnesota Court of Appeals decision

13.01.2020 | [Business Wire](#)

Poly Met Mining, Inc., a wholly-owned subsidiary of [PolyMet Mining Corp.](#) (together "PolyMet" or the "company") TSX: POM; NYSE American: PLM, released the following statement regarding today's Minnesota Court of Appeals decision remanding the Permit to Mine and dam safety permits back to the Department of Natural Resources for a contested case hearing:

"We obviously are disappointed in the court's decision. The administrative record for the NorthMet Project is built on a comprehensive process of scientific study, analysis and public review and comment established in state law, which we participated in for 15 years. We and the regulatory agencies have strictly followed that process. We are reviewing the decision and exploring all of our options, including filing a petition for review to the Minnesota Supreme Court.

"We remain firmly committed to putting people to work in northern Minnesota and will continue pushing forward on the project. The NorthMet deposit is abundant in metals that address climate change in the way of renewable and clean energy technologies. We are confident that we can produce these high-demand metals responsibly, with Minnesota workers, and in compliance with all applicable regulations."

About PolyMet

[PolyMet Mining Corp.](#) (www.polymetmining.com) is a publicly traded mine development company that owns 100% of Poly Met Mining, Inc., a Minnesota corporation that controls 100% of the NorthMet copper-nickel-precious metals ore body through a long-term lease, and owns 100% of the former LTV Steel Mining Company processing facility, located approximately seven rail miles from the ore body in the established mining district of the Mesabi Iron Range in northeastern Minnesota. Poly Met Mining, Inc. has completed its Definitive Feasibility Study and received all permits necessary to construct and operate the NorthMet Project. NorthMet is expected to require approximately two million hours of construction labor, create approximately 360 long-term jobs directly, and generate a level of activity that will have a significant multiplier effect in the local economy.

PolyMet Disclosures

This news release contains certain forward-looking statements concerning anticipated developments in PolyMet's operations in the future. Forward-looking statements are frequently, but not always, identified by words such as "expects," "anticipates," "believes," "intends," "estimates," "potential," "possible," "projects," "plans," and similar expressions, or statements that events, conditions or results "will," "may," "could," or "should" occur or be achieved or their negatives or other comparable words. These forward-looking statements may include statements regarding the ability to receive environmental and operating permits, job creation, and the effect on the local economy, or other statements that are not a statement of fact. Forward-looking statements address future events and conditions and therefore involve inherent known and unknown risks and uncertainties. Actual results may differ materially from those in the forward-looking statements due to risks facing PolyMet or due to actual facts differing from the assumptions underlying its predictions.

PolyMet's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and PolyMet does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations and opinions should change.

Specific reference is made to risk factors and other considerations underlying forward-looking statements discussed in PolyMet's most recent Annual Report on Form 40-F for the fiscal year ended December 31, 2018, and in our other filings with Canadian securities authorities and the U.S. Securities and Exchange Commission.

The Annual Report on Form 40-F also contains the company's mineral resource and other data as required under National Instrument 43-101.

The TSX has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
