

# Manganese X Energy Update: Ultra-Pure Manganese Sulfate Metallurgical Project

27.01.2020 | [Newsfile](#)

Montreal, January 27, 2020 - [Manganese X Energy Corp.](#) (TSXV: MN) (FSE: 9SC2) (TRADEGATE: 9SC2) (OTC Pink: SNCGF) (the "Company") is pleased to announce that Manganese X has received an encouraging progress report from Kemetco Research Inc ("Kemetco"). Kemetco is working to develop a commercializable flow sheet to produce a battery-grade manganese product for the growing electric vehicle and energy storage industries using the safe and sustainable North America mineralization at our Battery Hill property located in Woodstock, New Brunswick.

Kemetco reported that they have achieved a MnSO<sub>4</sub> purity of >99.8% with low contamination factors in the final manganese sulfate product, which is required by the EV and back up storage industries.

Assay tests are currently being performed by Kemetco to confirm the required commercial specifications of impurities. Also additional upgrading techniques and approaches are being aggressively pursued.

The Company along with Kemetco is very pleased with the progress of the ultra-pure manganese sulfate metallurgical project. We look forward to finalizing the flow sheet and advancing the project to the next phase, where bulk samples could be produced for independent assessments. Updates will follow.

## About Manganese X Energy

Manganese's mission is to acquire and advance high potential manganese mining prospects located in North America with the intent of supplying value added materials to the lithium ion battery and other alternative energy industries. In addition our company is striving to achieve new methodologies emanating from environmentally geographically ethical and friendly green/zero emissions, while processing manganese at a lower competitive cost.
