

Fremont Retains G2 Consultants to Provide Financial Public Relations Services

16.03.2020 | [Newsfile](#)

Vancouver, March 16, 2020 - [Fremont Gold Ltd.](#) (TSXV: FRE) (FSE: FR2) (OTC Pink: USTDF) ("Fremont" or the "Company") is pleased to announce that the Company has entered into a consulting agreement with G2 Consultants Corp. ("G2"), a financial public relations firm, to increase Fremont's profile within the financial community.

"I worked with G2 when I was a member of [Canplats Resources Corp.](#)'s senior management team," said Blaine Monaghan, CEO of Fremont. "After the discovery of the Camino Rojo gold deposit, Canplats was acquired by Goldcorp Inc. in a deal worth more than CAD\$300 million. G2 provided financial public relations services to Canplats from prediscovery until it was acquired by Goldcorp Inc. Based on my experience, I know that G2 can assist Fremont grow its audience as we ready the Griffon gold project for drilling. The drill program is fully funded and is expected to commence sometime this June. Griffon has not seen any drilling since the late '90s."

G2 is a financial public relations firm that assists public companies achieve their marketplace objectives. G2's services include strategic consulting, message development, investor targeting, investor outreach, investor feedback, investor conferences and road shows. G2 has been retained for a term of six months at a monthly fee of \$5,000 per month. The consulting agreement with G2 is subject to acceptance for filing by the TSX Venture Exchange.

Griffon gold project

Griffon is a past-producing gold mine located at the southern end of the Cortez Trend, approximately 75 kilometres southwest of Ely, and is accessed via paved highway and forest service roads. Mineralization at Griffon is Carlin-type and is comparable to the mineralization found at the Emigrant/Rain mine and the Alligator Ridge mine (incorporated into [Kinross Gold Corp.](#)'s Bald Mountain mine in the mid-1990s).

Griffon was first drilled in 1988 and a limited amount of shallow drilling (214 drill holes in total) focused on delineating the Discovery Ridge and Hammer Ridge deposits, leaving the remainder of the property essentially untested.

From 1997-1999, Alta Gold Co. ("Alta") produced approximately 90,000 ounces of gold at an average grade of 1.03 grams/tonne gold from Discovery Ridge and Hammer Ridge in an oxide heap-leach operation. Alta reported a number of unmined drill intercepts to the southwest of Hammer Ridge, including drill hole GR97-175 which returned 57.9 metres at 0.86 g/t gold, and proposed expanding Hammer Ridge before operations ceased.

Griffon hosts numerous gravity, soil and stratigraphic targets. The Pilot Shale horizon - the primary gold host at Fiore Gold Ltd.'s nearby Pan Mine - has not been adequately tested, and the Joana/Chainman transitional horizon, which hosts gold at Griffon, may be concealed underneath and within the Blackrock fault. Lastly, there is also potential in and around the pits, as demonstrated by drill hole GR97-175.

Underexplored and last drilled in the 1990s, Griffon offers multiple opportunities for the discovery of a Carlin-type gold deposit.
