#### About Aurania

Aurania is a mineral exploration company engaged in the identification, evaluation, acquisition and exploration of mineral property interests, with a focus on precious metals and copper. Its flagship asset, The Lost Cities &#8211; Cutucu Project, is located in the Jurassic Metallogenic Belt in the eastern foothills of the Andes mountain range of southeastern Ecuador.

Aurania's exploration is focused on gold, silver and copper in an area of Ecuador that has not been systematically explored since colonial Spanish times. Drawn to the area in search of the gold mines at Sevilla de Oro and Logrono de los Caballeros (the 'lost cities'), which produced gold from around 1565 to 1600, Aurania is exploring a large, 500,000-acre tract of land using modern techniques. Aurania has identified numerous targets for gold, silver and copper, and is directing its efforts on making a gold, silver or copper discovery in those areas.
