About Nouveau Monde Graphite

Nouveau Monde Graphite is developing the Matawinie graphite mining project, located in Saint-Michel-des-Saints, 150 km north of Montréal, QC. At the end of 2018, the Company published a Feasibility Study which revealed strong economics with projected graphite concentrate production of 100,000 tonnes per year, with an average concentrate purity of 97%, over a 26-year period. Currently, Nouveau Monde operates a demonstration plant where it produces concentrated flake graphite, which is being sent to potential North American and international clients for the qualification of its products. In a perspective of vertical integration within the electrical vehicle market, Nouveau Monde is planning a large-scale secondary graphite transformation facility, catering to the needs of the booming lithium-ion battery industry. Dedicated to high standards of sustainability, the Matawinie graphite project will be the first of its kind to operate as an all-electric, low-carbon mine.

About Virtual Investor Conferences®

Virtual Investor Conferences (VIC) is the leading proprietary investor conference series that provides an interactive forum for publicly-traded companies to meet and present directly with investors. A real-time solution for investor engagement, Virtual Investor Conferences is part of OTC Market Group's suite of investor relations services specifically designed for more efficient Investor Access.
