

Indigo Exploration Closes Djimbala Property Transaction, Mali

01.06.2020 | [Newsfile](#)

Vancouver, June 1, 2020 - [Indigo Exploration Inc.](#) (TSXV: IXI) (FSE: INE) (the "Company") announces that it has finalized the Option Agreement with [Desert Gold Ventures Inc.](#) ("Desert Gold") and its local Mali subsidiary, Desert Gold Mali SARL ("DGM"), to acquire up to a 100% interest in the Djimbala Permit in southern Mali, West Africa.

The Djimbala Permit lies immediately east of Hummingbird Resources' 0.7 million oz Au Komana gold mine¹, 21 kilometres north, along strike, of the Kodieran gold Mine and 28 kilometres north, along strike, from Endeavour Mining Corporation's high grade 3.3 million oz Au Kalana project².

Paul Cowley, President and CEO of the Company, states: "We are very pleased to move forward on the Djimbala option and with our recent financing, will initiate field work this month with mapping, prospecting and sampling of artisanal mine workings. We look forward to working with the Desert Gold team. The Djimbala Permit will complement the Company's West African gold-focused portfolio."

Under the terms of the four-year Option Agreement, the Company can acquire up to 100% interest in the Djimbala Permit by the issuance of shares and completing work. The Company has met and removed pre-conditions of the Option Agreement, including: a financing, the consolidation of the Company's shares and technical and title due diligence, setting a Commencement Date of May 29, 2020 for the Option Agreement, by the issuance of 1,000,000 shares to Desert Gold. The shares are subject to a four-month hold period that expires September 30, 2020. Three subsequent share issuances will be required over three years totalling \$300,000 at a deemed price equal to the volume weighted average price ("VWAP") for the prior 10-day trading period. With work expenditures of CAD \$400,000, the Company would earn a 51% interest in the permit, and with an additional CAD \$600,000 in work expenditures, the Company would earn a 100% interest in the permit, subject to a 2% net smelter royalty ("NSR") in favour of Desert Gold, where 1% NSR could be bought out at any time for USD \$1 million by the Company.

The Djimbala Permit is located in southern Mali, West Africa, 220 km south of the capital of Bamako and covers a 100 km² area. The permit is situated in the Yanfolila Gold Belt and is surrounded by a significant number of gold deposits, mines and prospecting permits. The bulk of the permit has not been explored. Two small soil sampling campaigns and a limited artisanal pit sampling program were completed by Desert Gold over parts of the permit with positive Au anomalies coinciding with interpreted favourable mineralized structures. Four north-south trending gold soil anomalies were defined, reflecting the regional structural trend. These soil anomalies also appear to correspond to the southern extension of the Faliko Fodela mineralized zones drilled by Gold Fields Limited immediately north of the Djimbala Permit. To date, several active artisanal workings were located during the limited soil campaigns, confirming Au mineralization.

On Behalf of the Board of Directors,

"Paul Cowley"
President and CEO
