

# SolGold PLC Announces Expert Technical Appointments

25.06.2020 | [ACCESS Newswire](#)

## *Expert Technical Appointments*

BISHOPSGATE, June 25, 2020 - The Board of Directors of SolGold (LSE:SOLG)(TSX:SOLG) is pleased to advise of the appointment of Mr Peter Holmes to the position of Director of Studies and Mr Steven Belohlawek to the position of General Manager-Underground Development and Mining.

Peter is a mining engineer and brings to SolGold extensive experience in large scale mining projects with a focus on project execution, which includes tailings management and above ground infrastructure. His career in the industry has spanned over 30 years and has covered a variety of roles and jurisdictions including Australia, Canada, USA, Africa, South America, Middle East, and Asia. During this time Peter has worked for a number of mining companies including 10 years with Barrick Gold based in Toronto working globally, Placer Dome and Normandy Poseidon, overseeing the successful execution of a number of projects including Buswagi, Osborne, Cortez Hills, Jabal Sayid and Barrick Gold's Pueblo Viejo project with a CAPEX of US\$3.6 billion. Peter's experience includes Brazil, Argentina, Chile and Peru working in both projects and operations which he brings to the group.

Peter's professional background has comprised of senior leadership positions that have included strategic planning, technical studies, as well as more hands-on operationally focussed roles. Peter, alongside Eduardo Valenzuela (Executive General Manager Studies) will be focussed on the Alpala Deposit Prefeasibility Study and Definitive Study workstreams and programs.

Steve is an underground mining engineer with over 20 years of project development and operations experience at world-class, large-scale mines in Australia and Indonesia. His career is built upon large scale underground mine design, scheduling, project development, mine commissioning and ramp-up. His experience includes 10 years at the Freeport underground block cave Grasberg mine expansions during which existing underground mines were expanded and two new super block caves were developed. The depth of these mines and their scale have few precedents. His experience also includes mine project development and establishment of sub-level cave and operations execution and planning of large-scale open-stopping mines including Olympic Dam with BHP, Telfer sub level cave construction with Newcrest, Big Gossan Mine and Deep Mill Level Zone with Freeport Indonesia and Hilton and Enterprise mines with Mount Isa Mines. Steve's expertise covers a broad skill set from feasibility studies through to large-scale underground mine planning and operations.

Commenting on the appointments, SolGold CEO Mr Nick Mather said:

"The appointment of both Peter Holmes and Steven Belohlawek is strategically important to the Company's growth in the next stage of its development. They both bring a fine-tuned skill set to SolGold that complements the forward-thinking dynamic and country changing projects that the Company will develop.

We are committed to developing the strength of the SolGold team as we enter the next stage of the Company's lifecycle. SolGold's PFS programme continues with a September 30, 2020 objective. With the conditional royalty funding from Franco-Nevada, and the recently completed equity raising of US\$40 million, the Company is fully funded for the next 18 months."

By order of the Board

Karl Schlobohm  
Company Secretary

## ABOUT SOLGOLD

SolGold is a leading resources company focussed on the discovery, definition and development of world-class copper and gold deposits. In 2018, SolGold's management team was recognised by the "Mines and Money" Forum as an example of excellence in the industry and continues to strive to deliver objectives efficiently and in the interests of shareholders. SolGold is the largest concession holder by land mass, and most active explorer in Ecuador and is aggressively exploring the length and breadth of this highly prospective and gold-rich section of the Andean Copper Belt.

The Company operates with transparency and in accordance with international best practices. SolGold is committed to delivering value to its shareholders, while simultaneously providing economic and social benefits to impacted communities, fostering a healthy and safe workplace and minimizing the environmental impact.

#### Dedicated stakeholders

SolGold employs a staff of 700 employees of whom 98% are Ecuadorian. This is expected to grow as the operations expand at Alpala, and in Ecuador generally. SolGold focusses its operations to be safe, reliable and environmentally responsible and maintains close relationships with its local communities. SolGold has engaged an increasingly skilled, refined and experienced team of geoscientists using state of the art geophysical and geochemical modelling applied to an extensive database to enable the delivery of ore grade intersections from nearly every drill hole at Alpala. SolGold has 86 geologists, of whom 30% are female, on the ground in Ecuador exploring for economic copper and gold deposits.

#### About Cascabel and Alpala

The Alpala deposit is the main target in the Cascabel concession, located on the northern section of the heavily endowed Andean Copper Belt, the entirety of which is renowned as the base for nearly half of the world's copper production. The project area hosts mineralisation of Eocene age, the same age as numerous Tier 1 deposits along the Andean Copper Belt in Chile and Peru to the south. The project base is located at Rocafuerte within the Cascabel concession in northern Ecuador, an approximately three-hour drive on sealed highway north of the capital Quito, close to water, power supply and Pacific ports.

Having fulfilled its earn-in requirements, SolGold is a registered shareholder with an unencumbered legal and beneficial 85% interest in ENSA (Exploraciones Novomining S.A.) which holds 100% of the Cascabel concession covering approximately 50km<sup>2</sup>. The minority equity owner in ENSA is required to repay 15% of costs since SolGold's earn in was completed, from 90% of its share of the distribution of earnings or dividends from ENSA or the Cascabel concession. It is also required to contribute to development or be diluted, and if its interest falls below 10%, it shall convert to a 0.5% NSR royalty which SolGold may acquire for US\$3.5m.

#### Advancing Alpala towards development

The resource at the Alpala deposit boasts a high-grade core which is targeted to facilitate early cashflows and an accelerated payback of initial capital. SolGold is currently assessing financing options available to the Company for the development of the Alpala mine following completion of the Definitive Feasibility Study.

#### Mineral Resource Estimate #3:

· Mineral Resource of 2,663 Mt @ 0.53% CuEq for 9.9 Mt Cu, 21.7 Moz Au and 92.2 Moz Ag in the Measured plus Indicated categories.

· Mineral Resource of 544 Mt @ 0.31% CuEq for 1.3 Mt Cu, 1.9 Moz Au and 10.6 Moz Ag in the Inferred category

#### SolGold's Regional Exploration Drive

SolGold is using its successful and cost-efficient blueprint established at Alpala, and Cascabel generally, to explore for additional world class copper and gold projects across Ecuador. SolGold is the largest and most active concessionaire in Ecuador.

The Company wholly-owns four other subsidiaries active throughout the country that are now focussed on thirteen high priority gold and copper resource targets, several of which the Company believes have the potential, subject to resource definition and feasibility, to be developed in close succession or even on a more accelerated basis compared to Alpala.

SolGold is listed on the London Stock Exchange and Toronto Stock Exchange (LSE/TSX: SOLG). The Company has on issue a total of 2,072,213,495 fully-paid ordinary shares and 183,662,000 unlisted options exercisable at various prices.

#### Quality Assurance / Quality Control on Sample Collection, Security and Assaying

SolGold operates according to its rigorous Quality Assurance and Quality Control (QA/QC) protocol, which is consistent with industry best practices.

Primary sample collection involves secure transport from SolGold's concessions in Ecuador, to the ALS certified sample preparation facility in Quito, Ecuador. Samples are then air freighted from Quito to the ALS certified laboratory in Lima, Peru where the assaying of drill core, channel samples, rock chips and soil samples is undertaken. SolGold utilises ALS certified laboratories in Canada and Australia for the analysis of metallurgical samples.

Samples are prepared and analysed using 100g 4-Acid digest ICP with MS finish for 48 elements on a 0.25g aliquot (ME-MS61). Laboratory performance is routinely monitored using umpire assays, check batches and inter-laboratory comparisons between ALS certified laboratory in Lima and the ACME certified laboratory in Cuenca, Ecuador.

In order to monitor the ongoing quality of its analytical database, SolGold's QA/QC protocol encompasses standard sampling methodologies, including the insertion of certified powder blanks, coarse chip blanks, standards, pulp duplicates and field duplicates. The blanks and standards are Certified Reference Materials supplied by Ore Research and Exploration, Australia.

SolGold's QA/QC protocol also monitors the ongoing quality of its analytical database. The Company's protocol involves Independent data validation of the digital analytical database including search for sample overlaps, duplicate or absent samples as well as anomalous assay and survey results. These are routinely performed ahead of Mineral Resource Estimates and Feasibility Studies. No material QA/QC issues have been identified with respect to sample collection, security and assaying.

Reviews of the sample preparation, chain of custody, data security procedures and assaying methods used by SolGold confirm that they are consistent with industry best practices and all results stated in this announcement have passed SolGold's QA/QC protocol.

#### CAUTIONARY NOTICE

News releases, presentations and public commentary made by [SolGold plc](http://www.solgold.com.au) (the "Company") and its Officers may contain certain statements and expressions of belief, expectation or opinion which are forward looking statements, and which relate, inter alia, to interpretations of exploration results to date and the Company's proposed strategy, plans and objectives or to the expectations or intentions of the Company's Directors. Such forward-looking and interpretative statements involve known and unknown risks, uncertainties and other important factors beyond the control of the Company that could cause the actual performance or achievements of the Company to be materially different from such interpretations and forward-looking statements.

Accordingly, the reader should not rely on any interpretations or forward-looking statements; and save as required by the exchange rules of the TSX and LSE or by applicable laws, the Company does not accept any obligation to disseminate any updates or revisions to such interpretations or forward-looking statements. The Company may reinterpret results to date as the status of its assets and projects changes with time expenditure, metals prices and other affecting circumstances.

This release may contain "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, but is not limited to, statements regarding the Company's plans for developing its properties, successful completion of the NSR Financing, future gold stream financing, resource estimates, the lifting of travel-related COVID-19 restrictions, results of exploration activities, development of the Alpala project, future funding participation by Cornerstone, future budgets to complete a feasibility study and re-activation of operations. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved".

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including but not limited to: timing of the lifting of COVID-19 related-related restrictions, satisfactory completion of site visit due diligence by Franco-Nevada, the ability to complete future financings on terms acceptable to SolGold, transaction risks; general business, economic, competitive, political and social uncertainties; future prices of mineral prices; accidents, labour disputes and shortages and other risks of the mining industry. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

The Company and its officers do not endorse, or reject or otherwise comment on the conclusions, interpretations or views expressed in press articles or third-party analysis, and where possible aims to circulate all available material on its website.
