

# Infinite Ore Doubles Drill Program on Fredart in Red Lake

30.06.2020 | [ACCESS Newswire](#)

VANCOUVER, June 30, 2020 - [Infinite Ore Corp.](#) ("ILI" or the "Company") (TSXV:ILI)(OTCQB:ARXRF) is very pleased to announce plans to double its current 5 hole drill program to 10 holes on the Fredart property located in the prolific Red Lake Mining District. Drilling to date has encountered massive to stringer sulphide mineralization which appears to be associated with banded iron formation horizons.

To date the drill program has intersected mineralization along strike at approximately 1.2 km to the east of the known core of the Cu-Ag mineralized area. The eastern area has seen little exploration and the target was selected by following a conductive and magnetic anomaly. In addition, drilling at Fredart has intersected mineralization at deeper levels than typically expected down to a depth of approximately 240 m. Previous drilling on the property had intersected mineralization principally from surface down to 150m depth. Until now 140 samples have been sent to SGS Laboratories for analysis.

Given the success and rapid advancement of the drill program the Company has elected to double the size of the program to 10 holes.

The goal of the current drill program is to confirm and expand on the VMS mineralized zones, test for gold mineralization, and refine the Leapfrog 3D model.

Dr. Michel Bolly, P.Geo, is the qualified person as defined by National Instrument 43-101 has designed and is managing the current drill program on behalf of Infinite Ore, and is responsible for approving the technical contents of this press release.

About Infinite Ore Corp.

Infinite Ore is a junior mining exploration company focused on seeking and acquiring world-class mineral projects globally. The company's current focus is on properties with the potential for VMS mineralization in the Confederation mineral belt near Red Lake, Ont., as well as the Jackpot lithium property located near Nipigon, Ont.
