About Nouveau Monde Graphite

Nouveau Monde Graphite is set to become a key player in the electrification revolution, as it plans to become the only fully-integrated (mining) company outside of China able to supply OEM's and automakers with battery anode material at any entry point along the supply chain. The Company has been successfully running a demo plant since the end of 2018 and has been qualifying both graphite flake and battery grade spherical graphite to potential clients in the EV space. Construction for a secondary processing (purification) plant is underway. As an all-electric open-pit operation and with processing plants running on inexpensive, renewable hydro power, Nouveau Monde will be the first graphite producer to be able to provide a certified carbon-neutral battery anode product. Commercial production slated for the end of 2022.

About Virtual Investor Conferences®

Virtual Investor Conferences (VIC) is the leading proprietary investor conference series that provides an interactive forum for publicly-traded companies to meet and present directly with investors.

A real-time solution for investor engagement, Virtual Investor Conferences is part of OTC Market Group's suite of investor relations services specifically designed for more efficient Investor Access.
