

# Trillium Gold Receives Rivard Property Drill Permit and Files Gold Centre and Leo Drill Permit Applications

23.12.2020 | [CNW](#)

- Drilling to commence early in the New Year
- Second rig already mobilized and on the property
- Testing the intersections of Rivard high-grade gold veins and the Newman Todd structure
- Drill permit applications made for both Gold Centre and the Leo project

VANCOUVER, BC, Dec. 23, 2020 /CNW/ - [Trillium Gold Mines Inc.](#) (TSXV: TGM) (OTCQX: TGLDF) (FRA: 0702) ("Trillium Gold" or "Company") is pleased to announce it has received its drill permit for the Rivard property, southwest part of the Newman Todd project, located in Red Lake, Ontario. A second diamond drill has already been mobilized to site and preparations are under way to begin drilling on the Rivard property as part of the drill program now in progress on the Newman Todd project. The drilling on the Rivard will focus on testing a structural corridor, containing high-grade gold veins, both along strike and at depth and determine the impact on the Newman Todd Structure to the east.

Russell Starr, CEO of Trillium Gold comments "Receiving the drill permit for Rivard is an exciting moment for Trillium Gold and our shareholders and is the beginning of several drill permits to come. The Rivard Property, which covers part of the southern extension of Newman Todd, has high grade visible gold at surface throughout property and has yet to be drilled in any way. The opportunity to drill the intersection of Rivard's high-grade gold bearing veins and the Newman Todd structure will create tremendous value for all our shareholders."

Permit applications have also been made for the Gold Centre property, immediately adjacent, and along strike of Evolution, Red Lake Mine and the Leo Property, approximately 40 km south of Red Lake. While the dates for obtaining these permits are not known, ultra-deep surface drilling is being planned for the Gold Centre Property that will confirm the Balmer volcanic rock previously intersected by Rupert Resources, and test for Red Lake Mine mineralization on the Gold Centre Property. Plans are underway for a dual-purpose overburden and bedrock drilling program, to begin early in 2021, on the Leo Property.

William Paterson, Trillium Gold's Vice President of Exploration comments, "I am glad for the Rivard permit and am really looking forward to testing the high-grade gold veins that have seen considerable historical shallow trench testing. We believe they will have a significant impact on the Newman Todd Zone. I am also anticipating beginning exploration work on both the Leo and Gold Centre Properties once those permits have been received."

The technical information presented in this news release has been reviewed and approved by William Paterson QP, P.Eng., Vice President of Exploration of Trillium Gold Mines, as defined by NI 43-101.

On behalf of the Board of Directors,

[Trillium Gold Mines Inc.](#)
