VANCOUVER, Feb. 04, 2021 - [Westhaven Gold Corp.](#) (TSX-V:WHN) is pleased to announce that drilling has resumed at its 17,623 hectare Shovelnose gold property. - Drilling has commenced with the first drill initially focused on extending the gold-silver mineralization encountered at the newly discovered FMN zone.

Within the 5.50m the company recorded the 3rd highest silver intercept drilled to date on this property (0.58m of 581 g/t Silver).
- Drilling will also focus on extending the strike of the Franz Zone which reported 7.78m of 14.84 g/t Au in September of 2020. (Please refer to long section below).
- A second drill rig will be deployed in Q1 to focus on step-out and infill drilling at the South Zone.
- A regional exploration program will target features delineated by work performed in 2020 and prior years. Activities will include drilling, prospecting, mapping, stream and soil sampling.
- Assays are pending for 19 completed drill holes in 2020 and will be released once received and interpreted by the Company.

Gareth Thomas, President & CEO of Westhaven Gold states: "The goal at the beginning of 2020 was to step outside of the South Zone and discover additional mineralized zones. Our exploration and operations team was successful in achieving that goal with the discovery of 3 new zones of high-grade gold and silver mineralization. All 3 of these zones remain open and will be the focus of initial drilling in 2021."
