

Emgold Mining Corp. Commences IP and Resistivity Study at Its Golden Arrow Property, NV

16.02.2021 | [ACCESS Newswire](#)

VANCOUVER, February 16, 2021 - [Emgold Mining Corp.](#) (TSXV:EMR)(OTC PINK:EGMCF) (FRA:EMLM) ("Emgold" or the "Company") announces that it has contracted with Zonge International Inc. to perform an induced polarization ("IP") and resistivity ground geophysics survey (the "Survey") at its Golden Arrow Property, NV (the "Property"). The Survey will cover an area south of known resource areas of Gold Coin and Hidden Hill and include the area of the 137 new unpatented lode mining claims recently staked by Emgold (see January 12, 2021 press release). The goal of the Survey is to identify additional exploration targets on the Property.

The data from the Survey will be analyzed in conjunction with the results of an airborne magnetic and radiometric geophysical survey and soil sampling program being conducted by Emgold (see December 21, 2020 and January 19, 2021 press releases). The Survey will help identify structures associated with Walker Lane and other trends near the western margin of the Kawich volcanic caldera and, potentially, new mineralized areas.

Field work began on January 24th and is expected to take approximately 30 days to complete. Final results from the Survey are expected in the first quarter of 2021. Completion of the work is dependent on weather conditions and potential Covid-19 impacts.

About the Golden Arrow Property

The Property is located approximately 40 miles east of Tonopah in Nye County, Nevada. It is an advanced-stage exploration property with a comprehensive exploration database including geochemical sampling, geophysics, and over 201,000 feet of reverse circulation and diamond core drilling.

To date, two main resource areas have been drilled on the Property focusing on bulk disseminated mineralization - the Gold Coin and Hidden Hill deposits. Numerous other exploration targets have been identified for exploration (see the Amended 2018 Updated Technical Report on the Golden Arrow Project, Nye County Nevada, USA, Report Date September 24, 2018, Effective Date August 28, 2018, available under Emgold's corporate filings at www.sedar.com).

Emgold's management believes there is potential to expand both the Hidden Hill and Gold Coin resource zones with drilling under an approved Plan of Operations and for discovery of other bulk disseminated mineralization on the Property. In addition, historic underground mine workings lie along the Page Fault and other structures on the Property, indicating potential for vein style mineralization that has been subject to limited modern exploration to evaluate its potential.

Qualified Person

Robert Pease, C.P.G., a qualified person under the NI 43-101 instrument, has reviewed and approved the content of this press release.

About Emgold

Emgold is a gold and base metal exploration company focused on Nevada and Quebec. The Company's strategy is to look for quality acquisitions, add value to these assets through exploration, and monetize them

through sale, joint ventures, option, royalty, and other transactions to create value for our shareholders (acquisition and divestiture (A&D) business model).

In Nevada, Emgold's Golden Arrow Property, the core asset of the Company, is an advanced stage gold and silver property with a well-defined measured and indicated resource. New York Canyon is a base metal property subject to an Earn-in with Option to Joint Venture Agreement with Kennecott Exploration, a subsidiary of Rio Tinto Plc (NYSE:RIO). The Mindora Property is a gold, silver, and base metal property located 12 miles from New York Canyon. Buckskin Rawhide East is a gold and silver property leased to Rawhide Mining LLC, operators of the adjacent Rawhide Mine.

In Quebec, the Casa South Property is an early-stage gold property adjacent to Hecla Mining Corporation's (NYSE:HL) operating Casa Berardi Mine. The East-West Property is a gold property adjacent to and on strike with Wesdome Gold Mine Ltd.'s (TSX:WDO) Kiena Complex and O3 Mining Corporation's (TSX:OIII) Malarctic Property (Marban Project). Emgold also has a 1% NSR in the Troilus North Property, part of the Troilus Mine Property being explored by Troilus Gold Corporation (TSX:TLG).

Note that the location of Emgold's properties adjacent to producing or past-producing mines does not guarantee exploration success at Emgold's properties or that mineral resources or reserves will be delineated. For more information on the Company, investors should review the Company's website at www.emgold.com or view the Company's filings available at www.sedar.com.
