

# Goldstar Minerals Inc. Commencing Targeting at Anctil and Updates Corporate Presentation

03.03.2021 | [GlobeNewswire](#)

MONTR?AL, March 03, 2021 - [Goldstar Minerals Inc.](#) ("Goldstar" or the "Corporation") (TSX-V: GDM) is pleased to announce it has begun reviewing all of the historical data combining this with all of the new information gathered in 2020 from both the prospecting and the VTEM survey in order to complete a targeting exercise that will be used for a 2021 drilling campaign on its Anctil property. Prospecting has outlined a large area of anomalous gold values and identified a tonalite intrusive in proximity of a historic gold intersect (DDH LA-87-06). An airborne VTEM survey completed in November 2020 has defined a potential NE-SW corridor where this intrusion has been identified.

David Crevier, CEO comments "The goal of the current targeting exercise is to maximize the opportunities along this relatively unexplored part of the system that we now understand to have kilometric potential".

Updated Corporate Presentation

The Corporation has updated its corporate presentation. It is available on the Corporation's website:
