

Dynasty Gold Receives Thundercloud Drill Permit

30.03.2021 | [Newsfile](#)

Vancouver, March 30, 2021 - [Dynasty Gold Corp.](#) (TSXV: DYG) (FWB: D5G) (OTC Pink: DGDCF) ("Dynasty" or the "Company") is pleased to announce that the Company has received the drill permit from the Ministry of Energy, Northern Development and Mines ("ENDM") Ontario for the Thundercloud property (the "Property") located in the Archean Manitou-Stormy Lakes Greenstone belt in Ontario. The Property is under option from [Teck Resources Ltd.](#) and the Company can earn up to a 100% interest (see press release dated February 1, 2018).

"It has been a challenging operating environment due to the Pandemic this past year and a pivotal moment for the Company was to receive the drill permit to proceed to the next stage of developing the Thundercloud property," stated Ivy Chong, President and CEO of the Company. "We would like to thank the Wabigoon First Nation communities in showing their support and the Ministry's effort in facilitating the process during these difficult times."

In 2011, Fladgate Exploration Consulting ("Fladgate") prepared a 3D geological model of the mineralized portion of the gold deposit and the Company plans to delineate the mineralization envelope through drilling as well as developing new drill targets in areas of showing high grade potential. 2007 trench results in the West Contact Zone returned 8.02 g/t gold over 39 meters, including 89.4 g/t gold over 3 meters. The mineralized strike length has been extended to 69 meters by the 2018 field work (see press release dated August 22, 2018). This and other areas of the Property have seen little drilling.
