Quarter ended December 31, 2020 - Operations

During the three months ended December 31, 2020 a total of 571,703 ore tonnes were mined at a strip ratio of 2.68. The proportion of total ore being sourced from the East pit continues to increase as operations transition out of the current phase of the Center pit, while pioneering in the West pit was completed. The elevated strip ratio was partially a result of work to remove a slough in the south wall of the East pit.

During the three months ended December 31, 2020 mining operations included 626,518 tonnes of ore crushed at an average gold grade of 0.55g/t, resulting in production of 11,124 Au ounces and 95,804 Ag ounces.

Numerous important capital projects were completed during the Stub Year:

1. Commissioned a 6.9 mile power line, resulting in the mine being switched over to grid power and costs dropping from 10 cents per kilowatt hour to 8 cents per kilowatt hour,
2. Commissioned an Intermediate Leach System to accelerate gold recoveries from the heap leach pad,
3. Completed the transition to a larger ore crush size,
4. Completed 57,345 feet of infill and exploration drilling from May to December 31, 2020.
