

# American Battery Metals Corporation COO, Menka Sethi, to Participate in U.S. Climate Action Week Panel with Zero Emission Transportation Association

19.04.2021 | [ACCESS Newswire](#)

Sethi To Speak About The Impact Of Battery Recycling Processes On The Growth Of Electric Vehicles

INCLINE VILLAGE, April 19, 2021 - Menka Sethi, Chief Operating Officer at [American Battery Metals Corp.](#) (OTCQB:ABML) (the "Company"), an American-owned lithium-ion battery recycling technology and advanced extraction company with extensive mineral resources in Nevada, which is in the process of changing its name to American Battery Technology Company (ABTC), will be a panelist in the upcoming Zero Emission Transportation Association's (ZETA) event discussing electric vehicles and the electrification of the transportation sector.

ZETA is hosting the panel as part of U.S. Climate Action week on April 20, 2021 at 1 p.m. EST complementing the Leaders Summit on Climate hosted by President Biden. With the panel just a few days before Earth Day, ZETA members including Proterra, EVgo, PG&E, as well as ABTC, will bring their expertise to the table to talk about the benefits of electrification.

"ABTC is a proud ZETA member and has built a clean technology platform that increases production of critical materials used in the batteries that power electric cars, aligning with ZETA's pillar of encouraging domestic manufacturing across the entire EV supply chain," stated Sethi. "I am looking forward to sharing our expertise and complementary vision with fellow ZETA member organizations to discuss why battery recycling is a required component for the U.S. to transition to electric vehicles and secure domestic production through environmentally sustainable processes."

To register for the panel and hear from Sethi and other ZETA members, visit the event page.

#### About American Battery Metals Corporation

American Battery Technology Company is uniquely positioned to supply battery metals through its three divisions: lithium-ion battery recycling, extraction technology, and primary resources. The Company recently announced the groundbreaking of its lithium-ion battery recycling facility in Fernley, NV, and issued a public statement outlining its principled approach to executing its ambitious business plan.

American Battery Technology Company has built a clean technology platform that increases production of primary metals used in the batteries that power electric cars, grid storage applications, consumer electronics and tools. The green platform creates a circular economy for battery metals that champions ethical and environmentally sustainable sourcing of critical materials.

#### Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including those with respect to the expected project economics for Western Nevada Basin (Railroad Valley), including estimates of life of mine, average production, cash costs, AISC, initial CAPEX, sustaining CAPEX, pre-tax IRR, pre-tax NPV, net cash flows and recovery rates, the impact of self-mining versus contract mining, the timing to obtain necessary permits, the submission of the project for final investment approval and the timing of initial gold production after investment approval and full financing, metallurgy and

processing expectations, the mineral resource estimate, expectations regarding the ability to expand the mineral resource through future drilling, ongoing work to be conducted at the Western Nevada Basin (Railroad Valley), and the potential results of such efforts, the potential commissioning of a Pre-Feasibility study and the effects on timing of the project, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve a number of risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, interpretations or reinterpretations of geologic information, unfavorable exploration results, inability to obtain permits required for future exploration, development or production, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; fluctuating mineral and commodity prices, final investment approval and the ability to obtain necessary financing on acceptable terms or at all. Additional information regarding the factors that may cause actual results to differ materially from these forward-looking statements is available in the Company's filings with the Securities and Exchange Commission, including the Annual Report on Form 10-K for the year ended June 30, 2020. The Company assumes no obligation to update any of the information contained or referenced in this press release.
