

# World Gold Council veröffentlicht Übersicht der offiziellen Goldbestände weltweit

13.08.2012 | [GoldSeiten](#)

Das World Gold Council hat gestern aktuelle Zahlen zu den offiziellen Goldbeständen weltweit veröffentlicht.

Auf Platz 1 befinden sich mit 8.133,5 Tonnen des Edelmetalls auch weiterhin die USA, der Anteil an den Währungsreserven liegt aktuell bei 75,1%. Mit deutlichem Abstand folgt Deutschland mit 3.395,5 Tonnen Gold, der Anteil an den Währungsreserven liegt bei 71,9%.

Kasachstans Goldreserven erhöhten sich verglichen mit dem im Juli veröffentlichten Stand um 1,6 Tonnen, Russland kaufte 6,7 Tonnen und Guatemala 0,2 Tonnen. Die Goldbestände der Türkei verringerten sich dagegen um 0,8 Tonnen. Die Goldreserven Mexikos gingen um 0,1 Tonne zurück und Deutschland verkaufte 0,7 Tonnen.

Die folgende Übersicht zeigt den aktuellsten Stand der weltweiten Goldreserven (Plätze 1 - 100):

NOTES

\* This table was updated in August 2012 and reports data available at that time. Data are taken from the International Monetary Fund's International Financial Statistics (IFS), August 2012 edition, and other sources where applicable. IFS data are two months in arrears, so holdings are as of June 2012 for most countries, May 2012 or earlier for late reporters. The table does not list all gold holders: countries which have not reported their gold holdings to the IMF in the last six months are not included, while other countries are known to hold gold but they do not report their holdings publicly. Where the WGC knows of movements that are not reported to the IMF or misprints, changes have been made.

\*\*The percentage share held in gold of total foreign reserves, as calculated by the World Gold Council. The value of gold holdings is calculated using the end of month London pm fix gold price published daily by the LBMA. In June the end of month gold price was \$1598.5. Data for the value of other reserves are taken from IFS, table 'Total Reserves minus Gold'.

1. BIS and IMF balance sheets do not allow this percentage to be calculated. In the case of any countries, up to date data for other reserves are not available.
2. BIS data are updated each year from the BIS's annual report to reflect the Bank's gold investment assets excluding any gold held in connection with swap operations, under which the Bank exchanges currencies for physical gold. The bank has an obligation to return the gold at the end of the contract.
3. West African Economic Monetary Union including the central bank.
4. Includes both "Monetary gold" and "Other gold" as reported by the central bank.
5. Signatories to the third Central Bank Gold Agreement which commenced in September 2009. The signatories include: ECB, Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland. Estonia became a signatory upon joining the Euro in January 2011.
6. Gold has been added to Turkey's balance sheet as a result of new policy accepting gold in its reserve requirements from commercial banks. Please see this link for information on this policy action <http://www.tcmb.gov.tr/yeni/announce/2011/ANO2011-50.htm>
7. Provisional data is based on dollar amount changes reported on the central bank's website and will remain provisional until the tonnage amount is confirmed from reporting to the IMF.
