

# Tarachi Reports Visible Gold Seen in RC Drill Cuttings on the Jabali Concession in Sonora, Mexico

12.05.2021 | [CNW](#)

(CSE: TRG)

VANCOUVER, BC, May 12, 2021 /CNW/ - [Tarachi Gold Corp.](#) (CSE: TRG) (OTCQB: TRGGF) (Frankfurt: 4RZ) ("Tarachi Gold Company") is pleased to announce its geology team has reported the presence of visible gold in drill cuttings from the completed surface reverse circulation ("RC") drill program south of the historic La Dura mine on the Company's Jabali concession. This is the first time that the Company has seen visible gold either in or around the La Dura mine.

Tarachi VP of Exploration and Director, Lorne Warner, commented: "Our geologists noting the presence of visible gold in drill cuttings is a nice surprise for us on the Jabali concession. This is the first time that we have come across visible gold in this area. Visible gold was not even seen in the many high-grade intercepts encountered by the underground core drilling program including the 5.6m intercept of more than an ounce per tonne announced last week."

The visible gold was observed in the drill cuttings from RC hole JAB-21-014 over an approximate interval of ten metres to 28m downhole. The drill hole was collared about 45m southeast of the historic underground workings at La Dura (Figure #1) at an azimuth of 15° and a dip of 60°. Company geologists discovered the visible gold by panning some of the extra drill cuttings from this interval (Figure #2). Assays are still pending from the RC drill holes, results are expected to be received from the laboratory in the coming weeks.

Based on the drilling and mapping done to date, the Tarachi geology team believes the gold is hosted in a 10-20m thick panel of heavily silicified rhyodacite striking roughly north-south, dipping to the east at an approximate angle of 30° and plunging to the south at 25°. Higher grade gold mineralization is suspected to be concentrated within this panel in vertical zones or sheets trending east-west. The RC surface drilling program is expected to provide greater clarity as to the true thickness of the panel and whether there are additional parallel structures at depth.

## Quality Assurance/Quality Control

Core samples were selected by a geologist and sawed in half. One half of the core remains in the core tray the other half is placed into a plastic bag. Sample tags were submitted into each bag before being sealed and stored at the campsite in a secure container. Samples were later transported by company truck directly to the Bureau Veritas Mineral Laboratories (BVM) in Hermosillo, Sonora, Mexico. At the laboratory, the samples were dried, crushed and pulverized with the pulps being sent airfreight for analysis to BVM in Vancouver, B.C. for 37-element ICP analysis after modified aqua regia digestion. Gold assays are done in Hermosillo by fire assay with an atomic absorption spectroscopy finish.

Samples were checked using a 50-gram fire assay with a gravimetric finish for samples greater than 10ppm Au and 1K Au. For samples less than 10ppm Au, a 50-gram fire assay with duplicate minus fraction analyzed. Both Hermosillo and Vancouver BVM facilities are ISO 9001 and ISO 17025 accredited. Laboratory control samples comprising certified reference samples, duplicates and blank samples were inserted into the sample stream and analyzed as part of the quality assurance/quality control protocol.

## About Tarachi Gold

Tarachi Gold is a Canadian-listed junior gold exploration company focused on exploring and developing projects in Mexico.

Company's Tarachi project covers 3,708ha of highly prospective mineral concessions in the Sierra Madre gold belt of S Mexico in close proximity to Alamos Gold's Mulatos mine and Agnico Eagle's La India mine. Tarachi has also acquired Magistral Mill and tailings project in Durango, Mexico. Magistral includes a 1,000 tpd mill and access to a tailings resou (non-compliant with NI 43-101) estimated to contain 1.3Mt at 2.05g/t Au which the Company expects to bring into produ 2022.

#### Qualified Person

Lorne Warner, P.Geo, VP Exploration and Director of the Company is a qualified person as defined by National Instrum and has reviewed and approved the scientific and technical disclosure in this news release.

#### SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS

This news release includes certain "Forward-Looking Statements" within the meaning of the United States Private Secu Litigation Reform Act of 1995 and "forward-looking information" under applicable Canadian securities laws. When used release, the words "anticipate", "believe", "estimate", "expect", "target", "plan", "forecast", "may", "would", "could", "sche similar words or expressions, identify forward-looking statements or information. These forward-looking statements or in relate to, among other things: future exploration programs, including the completion of drill holes; potential mineralizatio receipt of assay results.

Forward-looking statements and forward-looking information relating to any future mineral production, liquidity, enhance capital markets profile of Tarachi, future growth potential for Tarachi and its business, and future exploration plans are management's reasonable assumptions, estimates, expectations, analyses and opinions, which are based on manager experience and perception of trends, current conditions and expected developments, and other factors that managemen are relevant and reasonable in the circumstances, but which may prove to be incorrect. Assumptions have been made among other things, the price of silver, gold and other metals; no escalation in the severity of the COVID-19 pandemic; exploration and development; the estimated costs of development of exploration projects; Tarachi's ability to operate in effective manner and its ability to obtain financing on reasonable terms.

These statements reflect Tarachi's respective current views with respect to future events and are necessarily based up of other assumptions and estimates that, while considered reasonable by management, are inherently subject to signifi business, economic, competitive, political and social uncertainties and contingencies. Many factors, both known and un could cause actual results, performance or achievements to be materially different from the results, performance or ach that are or may be expressed or implied by such forward-looking statements or forward-looking information and Tarach assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: the C dependence on one mineral project; precious metals price volatility; risks associated with the conduct of the Company's activities in Mexico; regulatory, consent or permitting delays; risks relating to reliance on the Company's management t outside contractors; risks regarding mineral resources and reserves; the Company's inability to obtain insurance to cov on a commercially reasonable basis or at all; currency fluctuations; risks regarding the failure to generate sufficient cash operations; risks relating to project financing and equity issuances; risks and unknowns inherent in all mining projects, i inaccuracy of reserves and resources, metallurgical recoveries and capital and operating costs of such projects; contes to properties, particularly title to undeveloped properties; laws and regulations governing the environment, health and s ability of the communities in which the Company operates to manage and cope with the implications of COVID-19; the and financial implications of COVID-19 to the Company; operating or technical difficulties in connection with mining or c activities; employee relations, labour unrest or unavailability; the Company's interactions with surrounding communities artisanal miners; the Company's ability to successfully integrate acquired assets; the speculative nature of exploration a development, including the risks of diminishing quantities or grades of reserves; stock market volatility; conflicts of inter certain directors and officers; lack of liquidity for shareholders of the Company; litigation risk; and the factors identified u caption "Risk Factors" in Tarachi's management discussion and analysis. Readers are cautioned against attributing un to forward-looking statements or forward-looking information. Although Tarachi has attempted to identify important fact could cause actual results to differ materially, there may be other factors that cause results not to be anticipated, estima intended. Tarachi does not intend, and does not assume any obligation, to update these forward-looking statements or forward-looking information to reflect changes in assumptions or changes in circumstances or any other events affectin statements or information, other than as required by applicable law.
