

# American Battery Metals Corp. Hires Tiffiany Moehring, Previously Directed Corporate Communications Initiatives at Waste Management, Inc.

12.05.2021 | [ACCESS Newswire](#)

INCLINE VILLAGE, May 12, 2021 - [American Battery Metals Corp.](#) (OTCQB:ABML) (the "Company"), an American-owned lithium-ion battery recycling technology and advanced extraction company with extensive mineral resources in Nevada, which is in the process of changing its name to American Battery Technology Company, is pleased to welcome Tiffiany Moehring as Head of Corporate Communications. Tiffiany joins [American Battery Metals Corp.](#) from Waste Management, Inc. where she directed corporate communications initiatives with expertise in social impact (CSR/ESG), media relations, executive visibility, stakeholder engagement, traditional and social media, operational strategies and crisis communications.

"Tiffiany possesses the ideal background and skillset to continue to grow and evolve our work as a leader in lithium battery recycling and sustainable technologies," said Chief Operating Officer Menka Sethi. "Her deep experience in developing and leading environmentally-focused communications and corporate social responsibility programs will be tremendous and invaluable assets for us."

"I am extremely excited to join the [American Battery Metals Corp.](#) team and be an integral part of a company that is working to develop lithium battery solutions that will help address energy, waste and climate challenges that we are facing," stated Moehring.

Moehring has more than 20 years of experience in all aspects of communications, marketing and community engagement working across governmental, academic, community and corporate sectors with a focus on environmental, education and public services. She has worked extensively on communication efforts to educate consumers on the importance of recycling, sustainability and conservation.

## About American Battery Metals Corporation

American Battery Technology Company is uniquely positioned to supply battery metals through its three divisions: lithium-ion battery recycling, extraction technology, and primary resources. The Company recently announced the groundbreaking of its lithium-ion battery recycling facility in Fernley, NV, and issued a public statement outlining its principled approach to executing its ambitious business plan.

American Battery Technology Company has built a clean technology platform that increases production of primary metals used in the batteries that power electric cars, grid storage applications, consumer electronics and tools. The green platform creates a circular economy for battery metals that champions ethical and environmentally sustainable sourcing of critical materials.

## Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including those with respect to the expected project economics for Western Nevada Basin (Railroad Valley), including estimates of life of mine, average production, cash costs, AISC, initial CAPEX, sustaining CAPEX, pre-tax IRR, pre-tax NPV, net cash flows and recovery rates, the impact of self-mining versus contract mining, the timing to obtain necessary permits, the submission of the project for final investment approval and the timing of initial gold production after investment approval and full financing, metallurgy and processing expectations, the mineral resource estimate, expectations regarding the ability to expand the mineral resource through future drilling, ongoing work to be conducted at the Western Nevada Basin (Railroad Valley), and the potential results of such efforts, the potential commissioning of a Pre-Feasibility

study and the effects on timing of the project, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve a number of risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, interpretations or reinterpretations of geologic information, unfavorable exploration results, inability to obtain permits required for future exploration, development or production, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; fluctuating mineral and commodity prices, final investment approval and the ability to obtain necessary financing on acceptable terms or at all. Additional information regarding the factors that may cause actual results to differ materially from these forward-looking statements is available in the Company's filings with the Securities and Exchange Commission, including the Annual Report on Form 10-K for the year ended June 30, 2020. The Company assumes no obligation to update any of the information contained or referenced in this press release.
