

# Tudor Gold Expands Diamond Drilling on the Goldstorm Deposit with Four Drill Rigs at Treaty Creek, Northwestern B.C.

07.06.2021 | [Newsfile](#)

Vancouver, June 7, 2021 - [Tudor Gold Corp.](#) (TSXV: TUD) (FSE: TUC) (the "Company" or "Tudor Gold") is pleased to announce that two additional drill rigs have arrived at Treaty Creek (the "Project"), located in the heart of the Golden Triangle of Northwestern British Columbia. Diamond drilling continues with four rigs on the Goldstorm Deposit, which is on-trend from Seabridge Gold's KSM Project, located five kilometres to the southwest. Excellent progress has been made during the first two weeks of drilling on the fully funded 30,000 metre, Phase I exploration program (the "Program"). This deposit delineation and property exploration program will utilize up to six drills.

Tudor Gold's Vice President of Exploration and Project Development, Ken Konkin, P.Geo., states: "Despite higher than normal snowpack levels, crews have rapidly advanced the excavation of snow to expose drill sites allowing four diamond drill rigs to begin operations. We plan to prepare pad sites at other targets such as Perfect Storm (PSZ) and Eureka this month and will bring in two additional diamond drill rigs.

We are excited about drilling these promising new targets, however, the priority of our exploration program is to define the limits of the Goldstorm Deposit, as it currently remains open to expansion in all directions and at depth. In addition to potentially adding new gold equivalent (AuEq) ounces to the resource we will attempt to convert as much of the 7.9 million AuEq ounces of Inferred Resources to the Measured and Indicated Resource categories that currently total 19.41 million AuEq ounces. Concurrent with the drilling program, environmental base-line studies continue, including our water-sampling programs and installation of a weather monitoring station near our lower exploration camp.

[Tudor Gold Corp.](#) and our associated service companies have taken extreme measures to maintain the highest professional standards while working within COVID-19 health and safety protocols. Only essential personnel are permitted to enter the camp and staging areas. Of those workers who are at the project site and staging site, we have strict daily monitoring of the workers temperatures and general health conditions. We have a certified paramedic at the staging area to examine all in-coming and out-going Tudor personnel and all service providers."

Walter Storm, President and CEO, stated: "I am very pleased with the safe start-up of the 2021 exploration program at our flagship Treaty Creek Project thanks to the hard work and perseverance of our crew members. We look forward to increasing the pace and performance of this year's Program by expanding the number of drilling rigs at the Treaty Creek property. This start will help us complete the required drilling necessary to potentially expand and update the current resource estimate. The goal is to complete an updated Resource Estimate for the Goldstorm Deposit in 2022. We feel confident this will allow us to advance the Project with a Preliminary Economic Assessment study planned for 2022."

## Qualified Person

The Qualified Person for this news release for the purposes of National Instrument 43-101 is the Company's Vice President of Exploration and Project Development, Ken Konkin, P.Geo. He has read and approved the scientific and technical information that forms the basis for the disclosure contained in this news release.

## About Tudor Gold

[Tudor Gold Corp.](#) is a precious and base metals exploration and development company with properties in British Columbia's Golden Triangle (Canada), an area that hosts producing and past-producing mines and several large deposits that are approaching potential development. The 17,913 hectare Treaty Creek project

(in which TUDOR GOLD has a 60% interest) borders [Seabridge Gold Inc.](#)'s KSM property to the southwest and borders [Pretium Resources Inc.](#)'s Brucejack property to the southeast. In April 2021 Tudor published their 43-101 technical report, "Technical Report and Initial Mineral Resource Estimate of the Treaty Creek Gold Property, Skeena Mining Division, British Columbia Canada" dated March 1, 2021 on the Company's Sedar profile. The Company also has a 100% interest in the Crown project and a 100% interest in the Eskay North project, all located in the Golden Triangle area.

ON BEHALF OF THE BOARD OF DIRECTORS OF  
[Tudor Gold Corp.](#)

"Walter Storm"

Walter Storm  
President and Chief Executive Officer

#### Cautionary Statements regarding Forward-Looking Information

This news release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. "Forward-looking information" includes, but is not limited to, statements with respect to the activities, events or developments that the Company expects or anticipates will or may occur in the future, including the completion and anticipated results of planned exploration activities. Generally, but not always, forward-looking information and statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the negative connotation thereof or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof.

Such forward-looking information and statements are based on numerous assumptions, including among others, that the Company's planned exploration activities will be completed in a timely manner. Although the assumptions made by the Company in providing forward-looking information or making forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate.

There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's plans or expectations include risks relating to the actual results of current exploration activities, fluctuating gold prices, possibility of equipment breakdowns and delays, exploration cost overruns, availability of capital and financing, general economic, market or business conditions, regulatory changes, timeliness of government or regulatory approvals and other risks detailed

herein and from time to time in the filings made by the Company with securities regulators.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking information or implied by forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking statements or information.

The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as otherwise required by applicable securities legislation.
