

# Kenorland Announces Sale of Fox River Property

08.07.2021 | [CNW](#)

VANCOUVER, July 8, 2021 - [Kenorland Minerals Ltd.](#) ("Kenorland") is pleased to announce it has entered into a purchase agreement dated June 22, 2021 (the "Purchase Agreement") with Superior Nickel Inc. ("Superior"), a private Ontario corporation pursuant to which Superior will acquire a 100% interest in and to the Fox River property (the "Property"), located in the Fox River Belt, Manitoba.

As consideration for the Property, Superior will issue to Kenorland 2,665,000 common shares in its capital and will grant Kenorland a 2% net smelter return royalty on the Property.

## About the Fox River Belt and Kenorland's Fox River Property

The Fox River Belt (FRB) forms a portion of the Circum-Superior Belt in Northern Manitoba, Canada which is analogous to Manitoba's world class Thompson Nickel Belt (TNB) and the Cape Smith Belt (CSB) of Northern Quebec, host of the Roubidoux Nickel sulfide (NiS) deposits. Similar to the TNB and CSB, the belt is composed of sedimentary rocks intercalated with sequences of komatiitic basalts, and associated ultramafic intrusive rocks which formed along the margin of the Superior during the Paleoproterozoic.

Within the belt, the Fox River Sill is comprised of a layered mafic-ultramafic intrusive complex. Geochemical analysis of the sill indicates the potential for economic concentrations of Platinum group element (PGE) within the belt. This is supported by notable PGE occurrences and highlights the prospectivity of the sill for significant undiscovered PGE deposits. Additionally, basin assemblages of the Superior margin are host to world-class NiS districts such as the Thompson and Raglan Nickel sulfide deposits. Geochemical evidence, particularly the incorporation of sulfur (S) from rift related sediments into the mantle derived rocks of the Fox River Sill suggest the FRB to have high prospectivity for magmatic NiS deposits, like those found in the TNB and CSB.

Kenorland has applied a two-pronged approach to nickel targeting utilizing continental scale area selection coupled with high resolution geophysical direct detection of massive sulfide bodies to identify drill ready targets. This approach has led to the acquisition of Kenorland's FRB and Thompson South nickel projects (figure 1, inset). Kenorland's tenure in the FRB covers three ~5000 hectare mineral exploration licenses (MEL), named the T-Bone, Vector and Feeder Zones. Each of Kenorland's licenses cover coincident magnetic and electromagnetic (EM) anomalies derived through geophysical inversion, re-processing and interpretation of data, which cover geology prospective for NiS and PGE mineralisation which remain untested.

Zach Flood, President and CEO, states, "This transaction represents one of the ways Kenorland is able to create shareholder value and upside through its generative efforts, which does not require significant capital expenditures through direct exploration on ground. We are very excited to see what Superior Nickel will discover in the Fox River Belt, a vastly under-explored, yet highly prospective geologic feature within the Circum-Superior Belt."

## About Kenorland Minerals

[Kenorland Minerals Ltd.](#) (TSX.V KLD) is a mineral exploration Company incorporated under the laws of the Province of British Columbia and based in Vancouver, British Columbia, Canada. Kenorland's focus is early to advanced stage exploration in North America. The Company currently holds three projects in Quebec where work is being completed under joint venture arrangements with third parties. The Frotet Project is held under joint venture with Sumitomo Metal Mining Canada Ltd. (SMMCL). The Chicobi Project is optioned to SMMCL, and the Chebistuan Project is optioned to Newmont Corporation. The Company also holds 100% of the advanced stage Tanacross porphyry Cu-Au project as well as an option to earn up to 70% from Newmont on the Healy Project, both located in Alaska, USA.

Further information can be found on the Company's website [www.kenorlandminerals.com](http://www.kenorlandminerals.com)

### Cautionary Statement Regarding Forward Looking Statements

This news release contains forward-looking statements and forward-looking information (together, "forward-looking statements") within the meaning of applicable securities laws. All statements, other than statements of historical facts, are forward-looking statements. Generally, forward-looking statements can be identified by the use of terminology such as "plans", "expects", "estimates", "intends", "anticipates", "believes" or variations of such words, or statements that certain actions, events or "may", "could", "would", "might", "will be taken", "occur" or "be achieved". Forward looking statements involve risks, uncertainties and other factors disclosed under the heading "Risk Factors" and elsewhere in the Company's filings with Canadian securities regulators, that could cause actual results, performance, prospects and opportunities to differ materially from those expected or implied by such forward-looking statements. Although the Company believes that the assumptions and factors used in preparing these forward-looking statements are reasonable based upon the information currently available to management as of the date hereof, actual results and developments may differ materially from those contemplated by these statements. Readers are cautioned not to place undue reliance on these statements, which only apply as of the date of this news release, and no assurance can be given that such events will occur in the disclosed times frames or at all. Except where required by applicable law, the Company disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
