

Aker Solutions Awarded Subsea Contract Offshore Norway

09.07.2021 | [PR Newswire](#)

OSLO, July 9, 2021 - Aker Solutions has secured a substantial¹ contract from Aker BP to provide a subsea production system for the Kobra East & Gekko (KEG) field development, located in the Alvheim area of the North Sea.

The scope covers a complete subsea production system including four horizontal subsea trees, three manifolds, control systems, three static subsea umbilicals, as well as associated tie-in equipment and installation work.

Work starts immediately and will involve Aker Solutions' facilities in Brazil, Malaysia, Norway and the UK. Final deliveries are scheduled for the first quarter of 2023.

"This award continues our long-standing collaboration with Aker BP, through the Aker BP Subsea Alliance. The partnership enables Aker Solutions to engage early in the field development process, optimizing design solutions and contributing to a positive final investment decision. We look forward to continuing our alliance with Aker BP, with a continued strong focus on efficient operations while helping to reduce the carbon footprint," said Maria Peralta, executive vice president and head of Aker Solutions' subsea business.

The development comprises the two discoveries Kobra East and Gekko. The field will be developed as a subsea tie-back to the Alvheim FPSO, located approximately eight kilometers to the Alvheim FPSO, which is located in the Norwegian part of the central North Sea near the Norwegian-Danish border. Aker BP expects that CO₂ emissions per barrel will be cut in half and oil production from the Alvheim FPSO will increase when KEG comes on stream.

The award will be booked as order intake in the third quarter of 2021 in the Subsea segment.

¹Aker Solutions defines a substantial contract as being between NOK 700 million and NOK 1.2 billion.
