The flow-through shares will qualify as "flow-through shares" for the purposes of the Income Tax Act (Canada) (the "Act"). Each finder's warrant entitles the holder to purchase one common share at a price of \$0.33 for a two-year period.

The Company intends to use the net proceeds of the financing for advancement of exploration work at its Rock & Roll and Sugar properties, located in British Columbia, for general working capital and for assessment of future opportunities.

Etruscus is pleased to report that field crews have been mobilized to camp to commence exploration on the Rock & Roll and Sugar properties of Northwestern British Columbia. A field program (the "Program") is planned over these underexplored land packages to advance emerging targets, such as the Hurricane and Hammer targets, and investigate more than 20 other geological, geochemical, and geophysical target areas. Work planned for the 2021 field season will consist of geological mapping and geochemical rock, rock chip, soil and silt sampling programs.

The overall objective of the Program is to advance these targets towards a drill phase. The Company is waiting for drilling permit approval on its extended claims and expects it later this exploration season.
