

Currie Rose Resources Rossland Update

19.07.2021 | [Newsfile](#)

Toronto, July 19, 2021 - [Currie Rose Resources Inc.](#) (TSXV: CUI) ("Currie" or the "Company") provides an update of the Rossland Gold Project (the "Project") located in central southern British Columbia (Figure 1) and future activities.

Highlights:

- The Company has further consolidated its interest in the Rossland Gold Project.
- Work will concentrate on the prospective, underexplored 100% owned Golden 8 Project situated south of the town of Rossland.
- Currie has withdrawn from the Gertrude Prospect held by 0704723 BC Ltd.
- The company is actively seeking a new project to complement the Rossland Project.

Michael Griffiths, Currie's President and CEO, commented.

"The Company has withdrawn from most of the Rossland Project excluding the 100% owned Golden 8 claim which is well placed geologically for "Rossland style" mineralisation. We are now looking to conduct some first pass exploration to advance our understanding of its prospectivity."

"We are also pursuing other project options to add shareholder value."

Rossland Gold Project - Golden 8 Prospect

Previous historic mineral exploration work on the Golden 8 property included 66.3 metres of diamond drilling, VLF - EM ground geophysics programs and general prospecting activities.

Rossland type silver - gold - lead - zinc bearing vein structures were identified in the 2003 drill program and VLF-EM anomalies were generated in each of the ground geophysical programs. In 2013, ground prospecting near the south-eastern boundary of the mineral claim successfully identified float material that may be a continuation of gossanous sulphide vein showings identified in the area¹.

Future prospecting, sampling and detailed VLF-EM targeted exploration should concentrate on the Gossan and the eastern extension area of the Golden 8 Mineral Claim.

Accelerate Option

All the required documents have been lodged with the Toronto Exchange and subject to approval, Currie will issue 8,333,334 fully paid ordinary shares in the capital of Currie Rose to Accelerate at a deemed issue price of \$0.06 per Currie Rose Share.

About Rossland

The Rossland Gold Project is situated 10km west from the Trail Zinc Smelter in south-central British Columbia and covers approximately 3,000 Ha. The Rossland Mining Camp produced more than 2.7 million ounces of gold, 3.5 million ounces of silver and 71 tonnes of copper between 1894 and 1941 and ranks as the third largest lode gold camp in British Columbia².
