

Nippon Dragon Resources Inc. welcomes Mr. Kensaku KunJak Onoda-Song to its Board of Directors

11.08.2021 | [The Newswire](#)

Brossard, August 11th, 2021 - [Nippon Dragon Resources Inc.](#) ("Nippon" or "NDR") (TSXV:NIP) (OTC:RCCMF), is extremely pleased to welcome Mr. Kensaku KunJak Onoda-Song to its Board of Directors.

Mr. Onoda-Song has extensive experience in international business working with clients and partners around the globe as a successful consultant and advisor and board member of several businesses. Over the past 5 years he assisted the Company in business development and investor relations and has also acted as Nippon's Board Secretary. Having studied and lived in both Asia and North America, attending American schools since kindergarten, including Canadian Academy and MCU of California, his embracement and understanding of both cultures has given him the background essential for international business. Mr. Onoda-Song is the key person in establishing and maintaining a bridge between Canada and Asia and his vast business network and personal connections worldwide is a major asset to the Company.

"Ken's nomination to Nippon's board of directors will enable him to enhance his presence both in Japan and the rest of Asia which will be of particular benefit to the company" stated Mr. Jean-Yves Therien, Nippon's interim President & CEO.

About Nippon

Nippon is active in the exploration and the development of gold resources in Quebec. The Corporation holds two gold properties, Rocmec 1 with resources recognised in accordance with NI43-101 and the Denain property. Nippon also has an exclusive license for the Thermal Fragmentation mining method.

Le présent communiqué est disponible en français site web de Ressources Nippon Dragon

The company's growth strategy is based on:

- - The development of its gold deposits with the objective of producing revenue from its operations;
- Increasing the value of its mining assets by prioritizing the exploration targets; and
- The commercialisation and employment of its thermal fragmentation technology.
