ABOUT FIRST HELIUM

First Helium is a helium exploration and development company operating in the Worsley area, north of Grande Prairie, in Alberta, Canada. It was founded to capitalize on the untapped potential of significant helium resources in Western Canada, in response to the shifting supply dynamics of the global marketplace. Building on its successful discovery well, which has production tested at over 1.3% of helium content over three test periods, First Helium is working to develop its land base of over 32,000 hectares along the highly prospective Worsley helium trend. To establish its operating base, First Helium seeks to market its helium gas into the North American market via term off-take marketing arrangements with established third-party distribution companies.
