

Great Atlantic Starts Additional Diamond Drilling Program Targeting the New Otter Brook Gold Showing 100% Owned Golden Promise Gold Property

21.09.2021 | [ACCESS Newswire](#)

VANCOUVER, September 21, 2021 - [Great Atlantic Resources Corp.](#) (TSXV:GR) (the "Company" or "Great Atlantic") is pleased to announce it is currently mobilizing a diamond drill to the eastern region of its Golden Promise Gold Property specifically to the area of the Otter Brook gold showing. Drilling is scheduled to begin later this week. The Golden Promise Property is located within the central Newfoundland gold belt.

Rock samples collected by Great Atlantic during 2020 at the Otter Brook gold showing returned up to 5.75 grams per tonne (g/t) gold.

The drilling program will test under the Otter Brook gold showing and along its projected strike. The drilling permit in this target area allows for up to 12 drill holes.

Eight of 11 rock samples (float, subcrop and outcrop) collected by the Company at the Otter Brook gold showing during 2020 returned gold values in the 0.719 - 5.758 g/t range. An outcrop grab sample returned the highest value of 5.758 g/t gold.

The Golden Promise Property is located within a region of recent significant gold discoveries. The property is located within the Exploits Subzone of the Newfoundland Dunnage Zone. Within the Exploits Subzone, the property lies along the north-northwestern fringe of the Victoria Lake Supergroup (VLSG), a volcano-sedimentary terrane. The northwestern margin of the Golden Promise Property occurs proximal to, and, in part, contiguous with a major (Appalachian-scale) collisional boundary, and suture zone, known as the RIL. The RIL forms the western boundary of the Exploits Subzone. Recent significant gold discoveries within the Exploits Subzone include those of Marathon Gold Corp. (MOZ) at the Valentine Gold Project, Sokoman Minerals Corp. (TSXV.SIC) at the Moosehead Gold Project and New Found Gold Corp. (NFG) at the Queensway Project. Readers are warned that mineralization at the Valentine Gold Project, Moosehead Gold Project, and Queensway Project is not necessarily indicative of mineralization on the Golden Promise Property.

The 2020 program at the Otter Brook gold showing was managed by a Qualified Person. The rock samples were assayed for gold by Eastern Analytical Ltd. by Fire Assay - AA. Eastern Analytical Ltd. is independent of Great Atlantic.

David Martin, P.Geo., a Qualified Person as defined by NI 43-101 and VP Exploration for Great Atlantic, is responsible for the technical information contained in this News Release.

On Behalf of the board of directors

"Christopher R Anderson"
