Emerging Markets Report: The Leap

07.10.2021 | GlobeNewswire

ORLANDO, Oct. 07, 2021 - Amid a flurry of news about their compelling exploration interests that are an interesting read for those interested in CAVU Mining Corp. (CSE: CAVU) (OTC: CAVVF) (FSE: 8NQ), a mining company engaged in the acquisition, exploration, and development of mineral projects containing metals used in green technologies and the renewable energy sector comes this headline:

"CAVU Mining Announces Application to List on the OTCQB"

For followers of the Company this is a very big deal.

The OTCQB is the premiere marketplace for early stage and developing U.S. and international companies that are committed to providing a high-quality trading and information experience for their U.S. investors.

We've been intrigued by the Company's copper explorations and the role of copper in Electric Vehicles. Here's a previous report to that end.

Applying for listing on OTC Markets' OTCQB and receiving acceptance would be an important development for CAVU and its shareholders.

The financial and disclosure reporting requirements of OTC Markets provides pathway to better know the Company's business, whom it does business with and how, and its financial condition.

And that leads the Company to a place where it may be positioned to entertain a different type of investor or even a firm.

It is important to boldly note that the Company has APPLIED for its common shares to be quoted.

We like the confidence, and if approved and effectively quoted on the OTCQB, CAVU's CEO can take pride in having accomplished this for the Company and its shareholders.
