## About Aduro Clean Technologies

Headquartered in Sarnia, Ontario, Aduro Clean Technologies is developer of patented water-based technologies to:

- chemically recycle waste plastics
- convert heavy crude and bitumen into lighter, more valuable oil
- and transform renewable oils into higher-value fuels or renewable chemicals

The company's Hydrochemolytic technology activates unique properties of water in a chemistry platform that operates at relatively low temperatures and cost - a game-changing approach that converts low-value feedstocks into 21st-century resources. With funding and support from Bioindustrial Innovation Canada, the Aduro has developed a pre-pilot reactor system to upgrade heavy petroleum into lighter oil.

Today Aduro announced that this coming November it will attend the 2021 Mexican Petroleum Congress as one of ten companies selected to join Canada's Commercial Trade Mission. Additional information on Aduro Clean Technologies is available on the Company's website, <https://adurocleantech.com>.
