

Kiplin Metals Looks to Expand Uranium Project Portfolio Athabasca, Canada

26.10.2021 | [The Newswire](#)

Vancouver, October 25th, 2021 - [Kiplin Metals Inc.](#) (the "Company") (TSXV:KIP) (Frankfurt: 17G1) announces that its board of directors has commenced a strategic review of several uranium projects in Athabasca, Saskatchewan, Canada with the plan to expand the Company's project portfolio.

Peter Born, Director of the Company commented; "after considerable consultation with our strategic advisors, the board has determined that, given the deep technical knowledge of our team, combined with the global initiative to transition the world's energy needs away from fossil fuels, the company has initiated a strategic review of several uranium projects in Athabasca, Saskatchewan. The company's technical team has extension experience with uranium exploration and we are confident the addition will bring significant value to Kiplin Metals shareholders."

About Kiplin Metals

Kiplin Metals is an early-stage exploration and development mining company. The Company's management understands that the greatest value creation for shareholders is through the discovery, and development of mineral resources, therefore the company focuses on project that can provide such impact. Kiplin Metals has the rights to two highly perspective minerals exploration assets in Canada, a region in the world known for its resources, collaborative regulatory structure and stable economic and political environment.

The Exxeter Gold Project covers an area of 715ha located in Val d'Or Quebec, one of the premier gold camps in the world which produced over 113.4M oz Au by the end of 2019. The project covers 3.8km of the Cadillac Tectonic zone, which is the principal geologic structure responsible for cold mineralization in the Val d'Or.

The Lac Rochester Copper Project is located on the eastern border of the Val d'Or mining camp, 50km southeast of the city of Val D'Or, and 14km south of the Company's flagship property, the Exxeter Gold Project. Past exploration of the Lac Rochester Copper Project has identified multiple high copper and iron values, concurrent with a large, northeast trending magnetic anomaly.

For further information, contact the Company at 604-622-1199.

On behalf of the Board of Directors,

"Peter Born"

Director
