

Harvest Gold Corp. Emerson 3D IP Survey Presentation Now Available as Drill Plans Being Finalized

30.11.2021 | [The Newswire](#)

Vancouver, November 30, 2021 - [Harvest Gold Corp.](#) (TSXV:HVG) ("Harvest Gold" or the "Company") announces the posting of an abridged version of the Emerson property presentation of the 3D IP results/interpretations. Emerson's co-vendor and member of Harvest Gold's geoscience team, Henry Awmack, is featured. It is being posted today so all shareholders and market watchers can better understand the potential of finding a Blackwater like ore body at Emerson.

The 56 km² Emerson Property comprises 14 contiguous mineral claims located 15 km west of Houston, B.C. with a nearby railroad, high voltage powerline and gas pipeline. It is 100% owned by Harvest Gold.

Harvest Gold President and CEO Rick Mark states: "Henry Awmack is a successful and respected Geologist helping guide our technical team. He reminded me he is not a public speaker but watching him in several recent analysts' meetings convinced me this presentation was essential for public viewing."

Mark continues: "Henry's analysis of the 3D IP at Emerson and particularly the changes it depicts in 50-meter increments from surface to 400 metres depth in two essential measures made an impact in each meeting. Henry describes chargeability and resistivity in a way that all of us can understand. Director and geologist, Pat Donnelly closes this 7-minute piece with a brief look at the major infrastructure advantages we have at Emerson should this very shallow target contain mineralization. Our initial drill program is slated to begin near the end of January 2022."

Qualified Person Statement

The disclosure of technical or scientific information in this press release has been reviewed and approved by Warren Bates, P.Geo. Director of Property Investigations for Harvest Gold. Mr. Bates serves as a Qualified Person under the definition of National Instrument 43-101.

About Harvest Gold Corporation

Harvest Gold is focused on the Interior Plateau of British Columbia exploring for near surface Gold deposits and Copper Gold Porphyry deposits. Harvest Gold's board of directors, management team and technical advisors have collective geological and financing experience exceeding 400 years.

Harvest Gold acknowledges that the Emerson and Goathorn Projects are situated in the traditional territory of the Wet'suet'en Nation while the Jacobite Project is situated in the traditional territory of the Lake Babine Nation. Harvest Gold is committed to developing positive and mutually beneficial relationships based on respect and transparency with local Indigenous communities.

ON BEHALF OF THE BOARD OF DIRECTORS

Rick Mark
President and CEO
[Harvest Gold Corp.](#)

Forward Looking Information

This news release includes certain statements that may be deemed "forward looking statements". All statements in this news release, other than statements of historical facts, that address events or developments that Harvest Gold expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur.

This news release may include technical information that was generated prior to the introduction of National Instrument 43-101. Details of the sampling methods, handling, and quality control methods used in the generation of this historical technical data are unknown to Harvest Gold, and the drill material, assay results, true width of intercepts herein cannot be and have not been verified by the Company's Qualified Person for the purposes of National Instrument 43-101.

A number of mineral resources or significant occurrences disclosed herein relate to nearby properties owned by other companies, and the data presented have been extracted from these companies' press releases and websites. A Qualified Person has been unable to verify this information from the adjacent properties, and such results are not necessarily indicative of potential quantities or grades of mineralization on the Company's properties.

Relating to exploration, the identification of exploration targets and any implied future investigation of such targets on the basis of specific geological, geochemical and geophysical evidence or trends are future-looking and subject to a variety of possible outcomes which may or may not include the discovery, or extension, or termination of mineralization. Further, areas around known mineralized intersections or surface showings may be marked by wording such as "open", "untested", "possible extension" or "exploration potential" or by symbols such as "?". Such wording or symbols should not be construed as a certainty that mineralization continues or that the character of mineralization (e.g. grade or thickness) will remain consistent from a known and measured data point. The key risks related to exploration in general are that chances of identifying economical reserves are extremely small.

Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
